

# Circle Burst Assets

Drag-and-Drop Video Assets

# Getting Started

## Download and Install Font

To download the Circle Burst Assets, simply visit the download page on RocketStock.com. If you are reading this, then odds are you've probably already completed this step. If not, navigate to [www.RocketStock.com/blog/RANDOMFREEBIE](http://www.RocketStock.com/blog/RANDOMFREEBIE) and click the **Download** button.

Once your files download as a .zip file, just unzip and look for the assets in a folder labeled **Circle Burst Assets**.

## Launch Any Project

Simply open any After Effects project. These video assets work across every version of After Effects, so your current software version doesn't matter.

## Import Assets

To import the assets into your project, select File>Import in the menu bar. A window called **Import File** will launch. Select assets from your hard drive, then click **Open** in the lower right corner of the window.

# Step 1: Move Assets Into the Composition

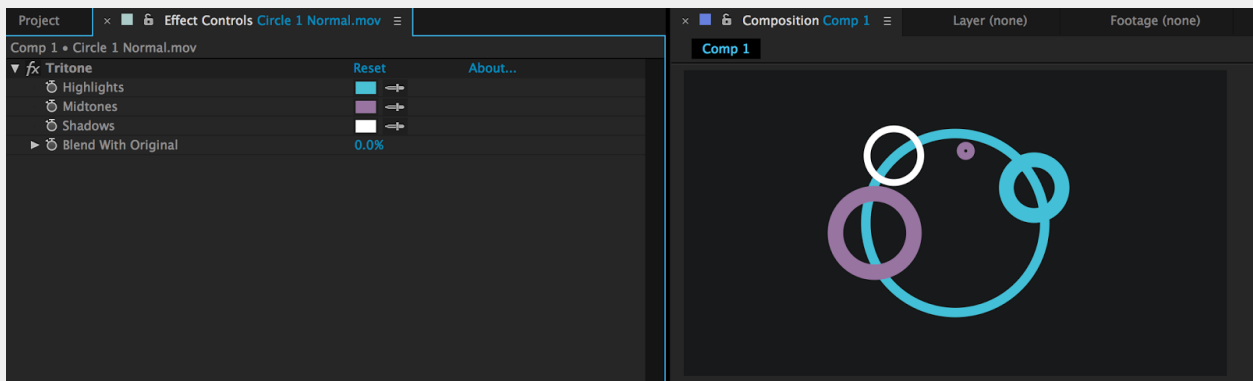

After importing, the assets will be located in your project panel. Simply drag your video elements into your composition like any other footage. The footage contains alpha channels, meaning there is no need to key out the footage.

Name	Type	Size	Media Duration	File Path
Circle 1 Fast.mov	QuickTime	3.7 MB	0;00;01;01	/Users/...nloa
Circle 1 Normal.mov	QuickTime	9.2 MB	0;00;02;16	/Users/...ads
Circle 1 Slow.mov	QuickTime	... MB	0;00;05;00	/Users/...nloa
Circle 2 Fast.mov	QuickTime	3.3 MB	0;00;01;01	/Users/...nloa
Circle 2 Normal.mov	QuickTime	8.0 MB	0;00;02;15	/Users/...ads

*Note: Some assets are only a few seconds in length.*

# Step 2: Colorize as Needed

In the effects panel, type in 'Tritone' and drag the effect onto your desired circle burst asset.

By adjusting each tritone color, you will adjust a corresponding asset color in the circle burst animation.

*Note: Some assets only feature two colors.*
