

VisionLOG (v.2) by VisionColor

for Adobe Camera RAW (ACR) and Light Room

1.) Installation

To install the VisionLOG DCP Camera Profiles simply drag and drop the entire **VisionLOG Folder** into your **Camera Profiles** folder (may be hidden by default*).

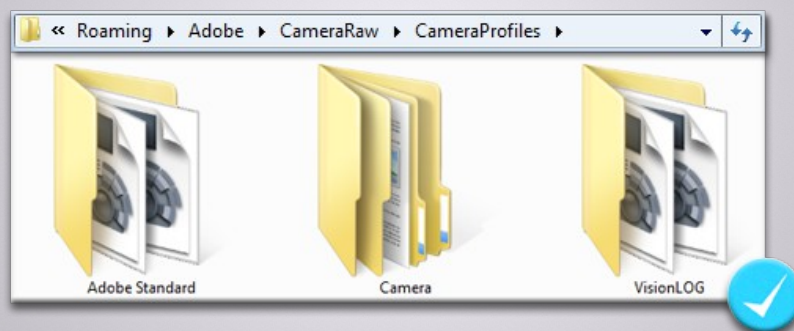

If you have an older version of VisionLOG installed [replace all previous file versions!](#)

Mac OS:

HD:/Users/*yourusername*/Library/ApplicationSupport/Adobe/CameraRaw/CameraProfiles

Windows:

C:/Users/*yourusername*/AppData/Roaming/Adobe/CameraRaw/CameraProfiles

*How to display hidden folders on MAC OS: [Click here](#). Windows: [Here](#).

IMPORTANT: To update VisionLOG drag the new folder into the CameraProfiles folder and REPLACE all previous versions!

You'll now be able to convert RAW files from supported cameras to LOG by navigating to the camera calibration tab and choosing VisionLOG from the camera profile list.
