

Premiere Pro Profiles for Stream Deck

Introduction

Thanks for downloading the Adobe Premiere Pro Profiles pack. This set is designed for professional workflows by organizing the most often used commands for particular tasks when working with Premiere.

Included are fully programmed profiles for Stream Deck XL and Stream Deck 15 key devices featuring over 570 shortcut commands including 817 custom made icons. The Stream Deck comes in two versions, one labelled, and one unlabelled that can be easily switched between the two by one button on the main menu. All of the icons have also been provided allowing you to easily customize the profiles to your particular workflow.

Both the Mac and the PC versions are nearly identical with the exception of a few commands not available on the PC due to shortcut quantity restrictions on the platform.

Please follow the instructions on the following pages to get up and running quickly and visit the SideshowFX store for more Icon Set titles at www.sideshowfx.net/buy

Installation

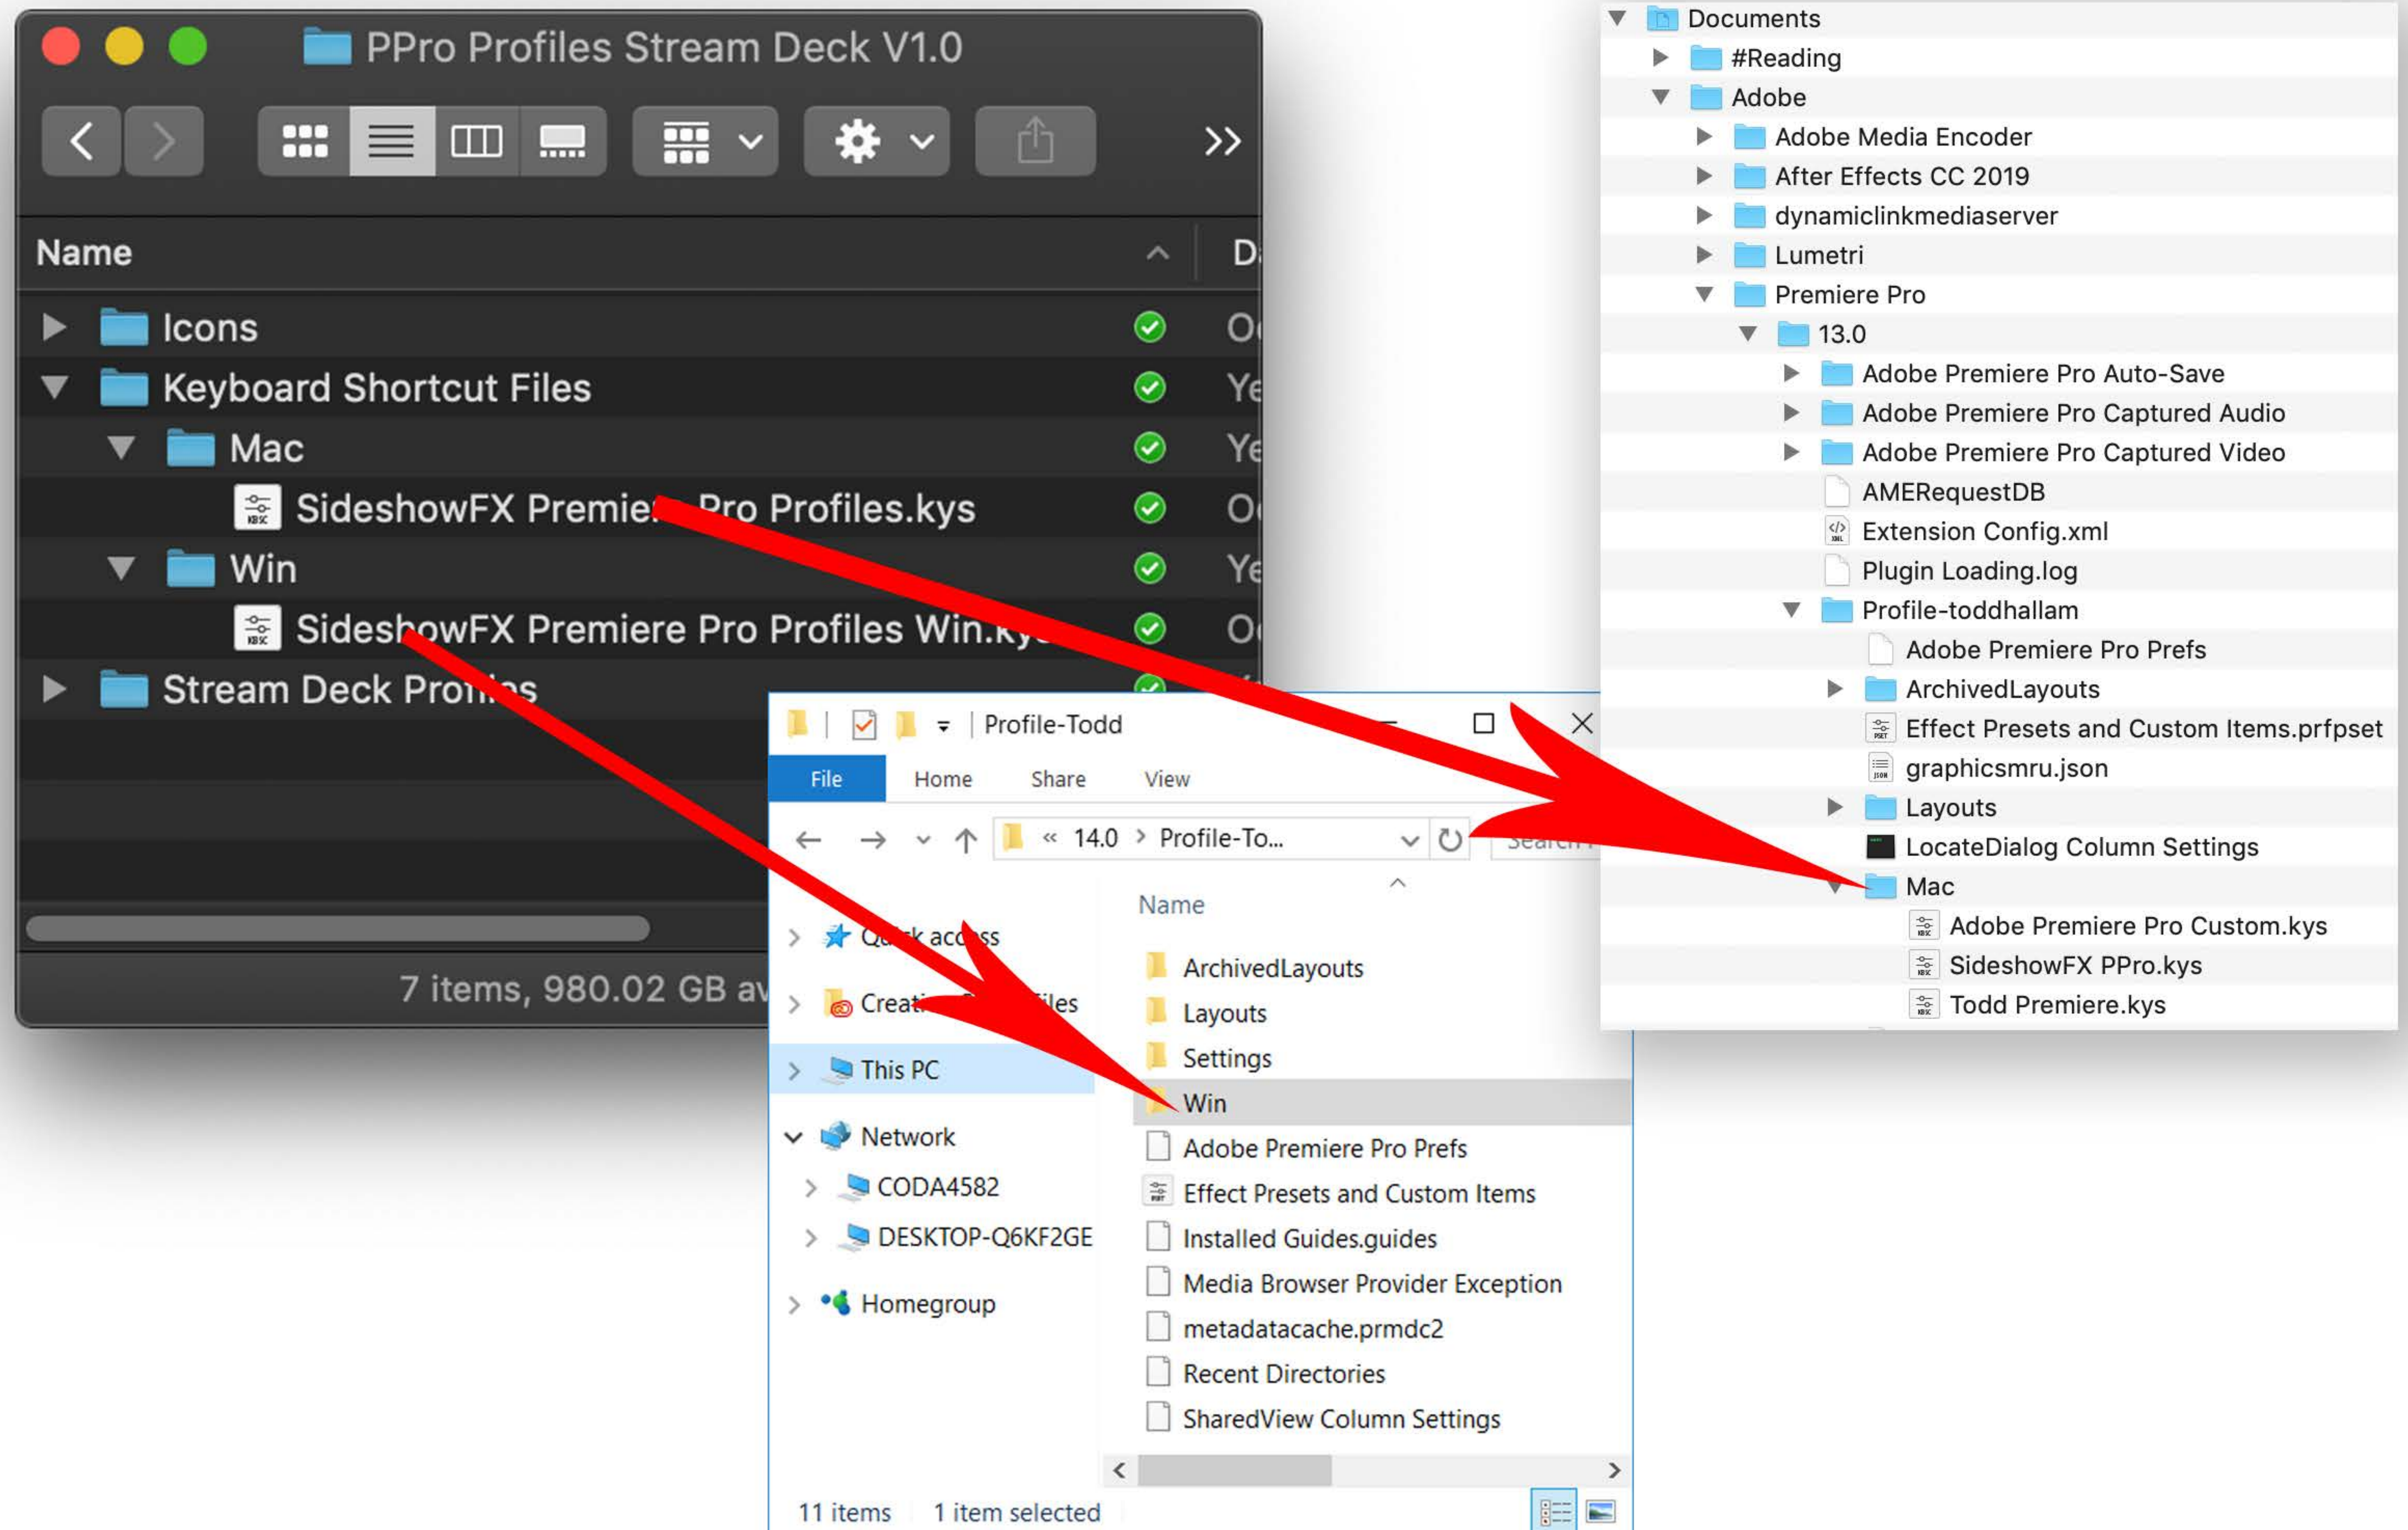

Installing the Keyboard Shortcuts

First, in order for the key commands in Stream Deck to work, you will need to install the supplied custom keyboard layout. Drag the file SideshowFX PPro.kys to your application profile folder.

Mac: "**username**"/documents/adobe/Premiere Pro/13.0*/profile-"**username**"/Mac

Win: Documents/Adobe Premiere Pro_/13.0*/Profile-"**username**"/Win

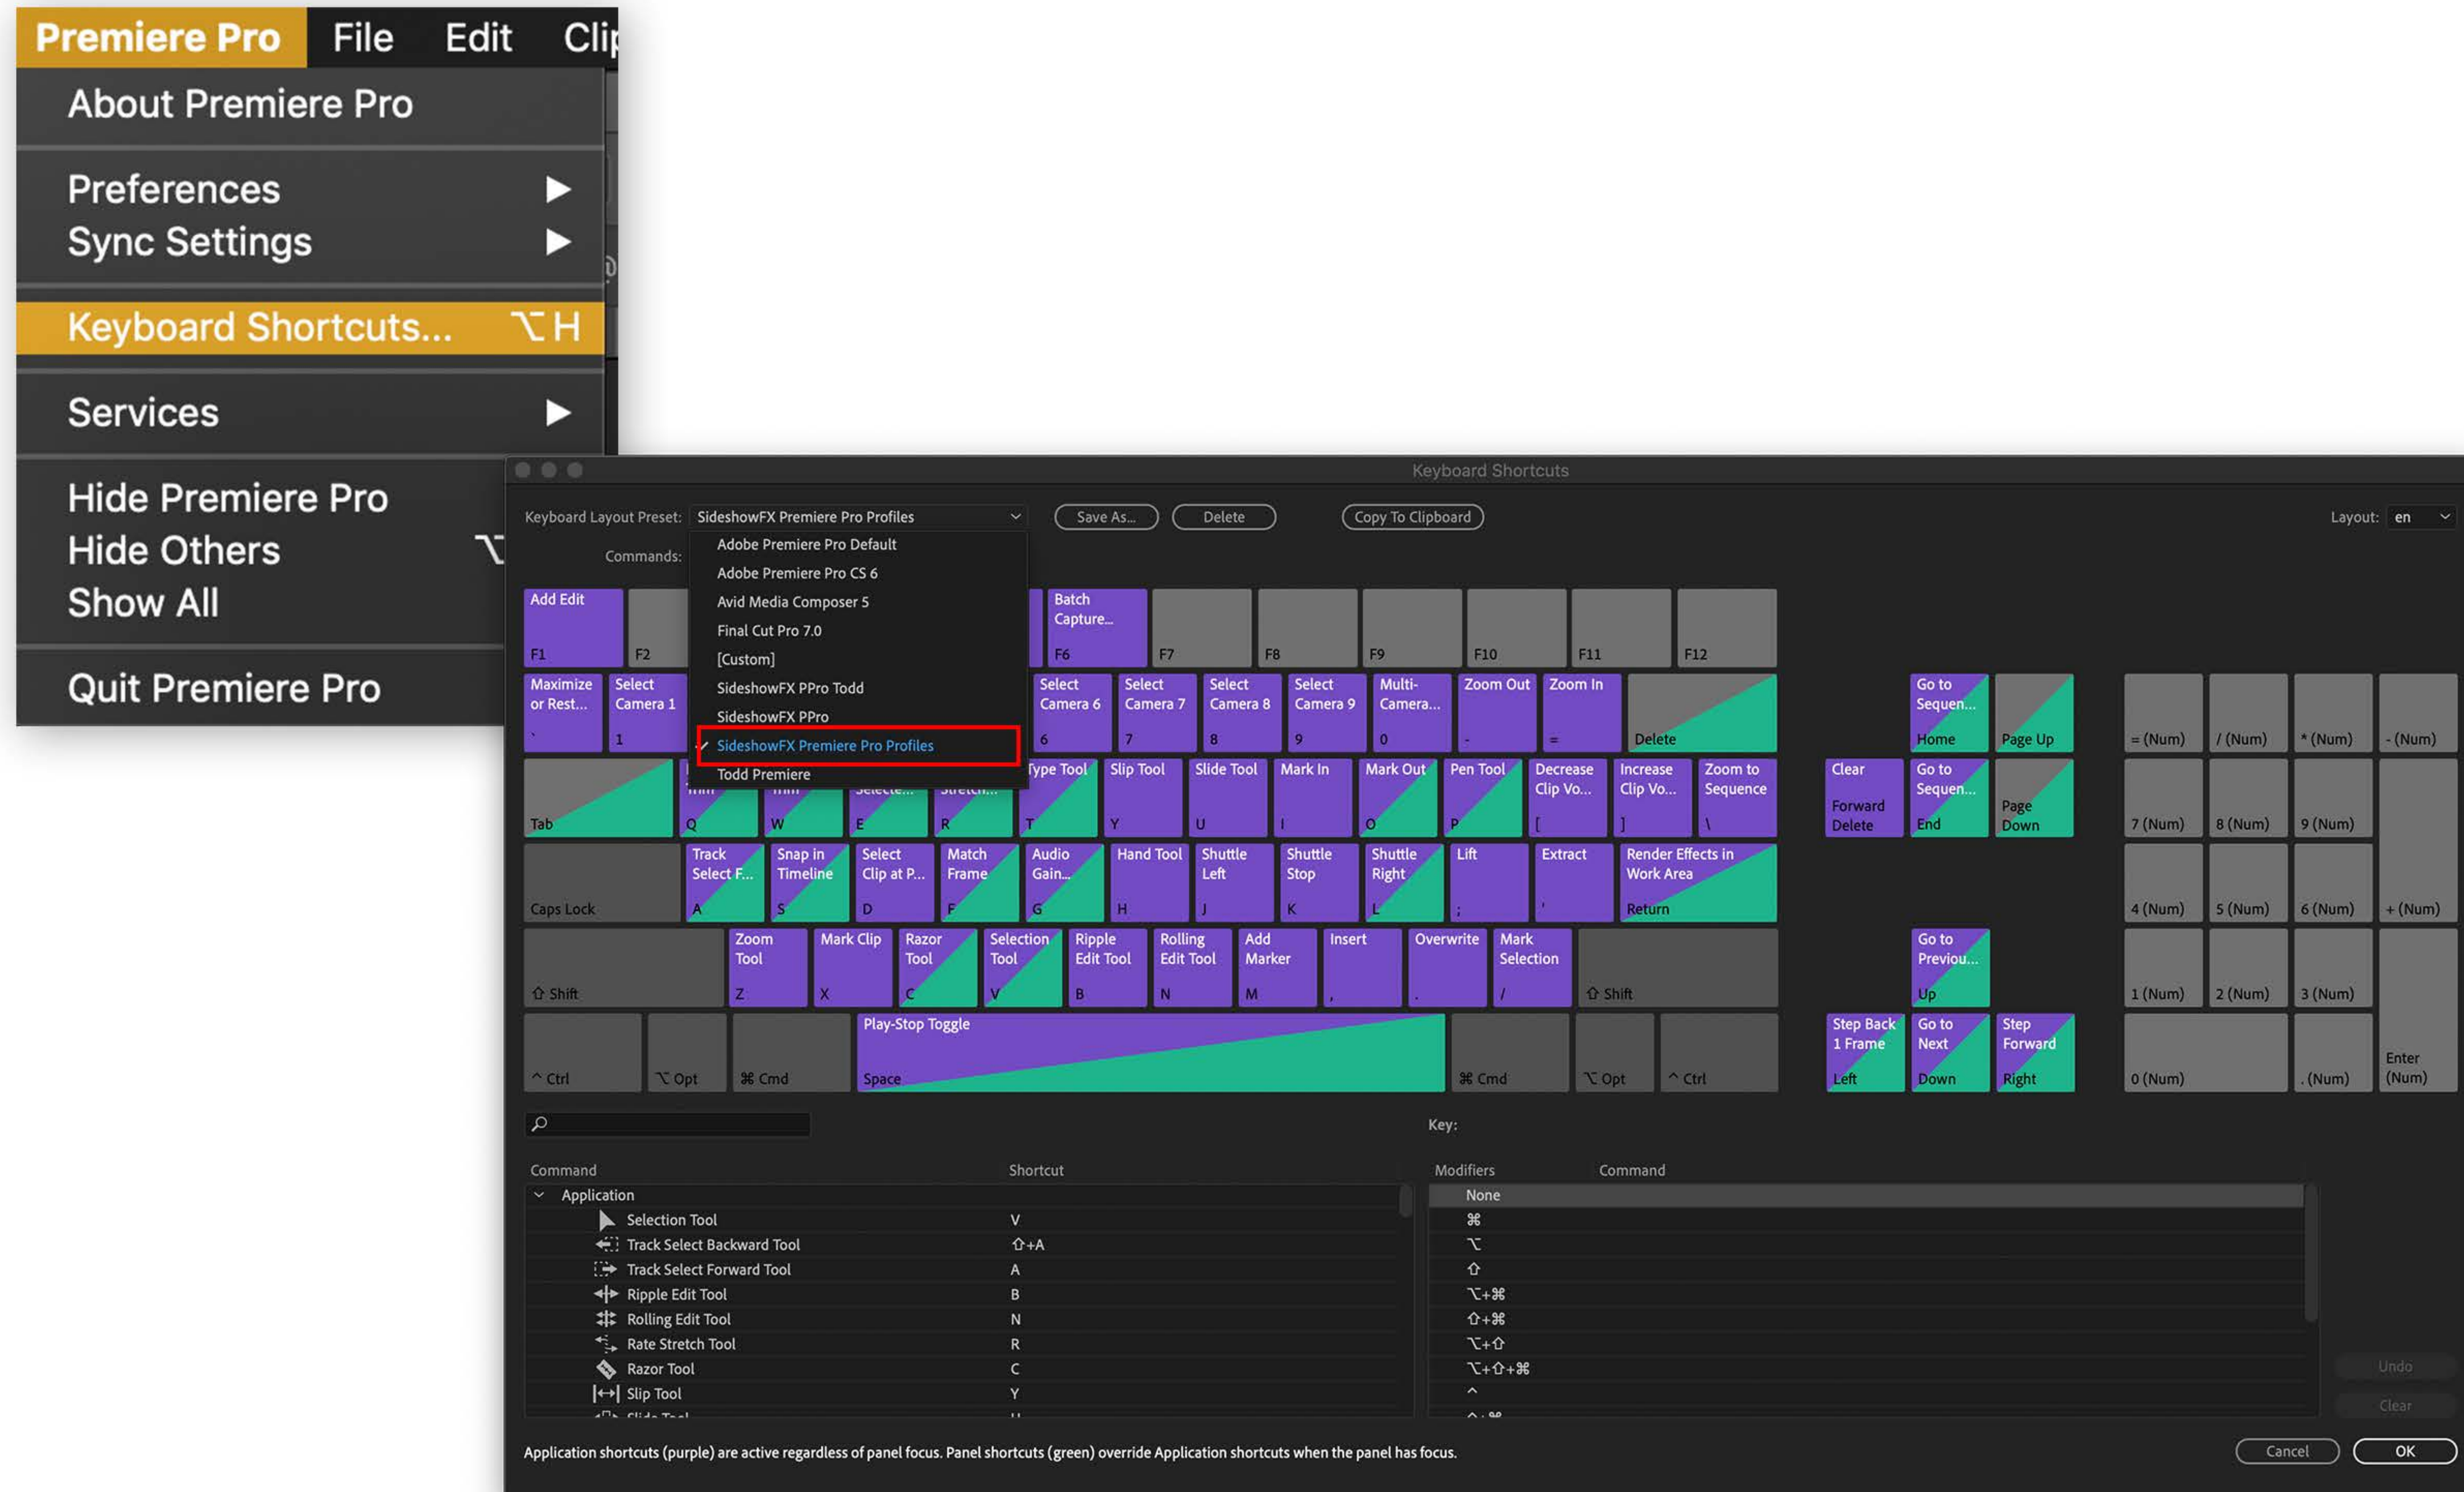

*your version number may be different

Installation

Installing the Keyboard Shortcuts

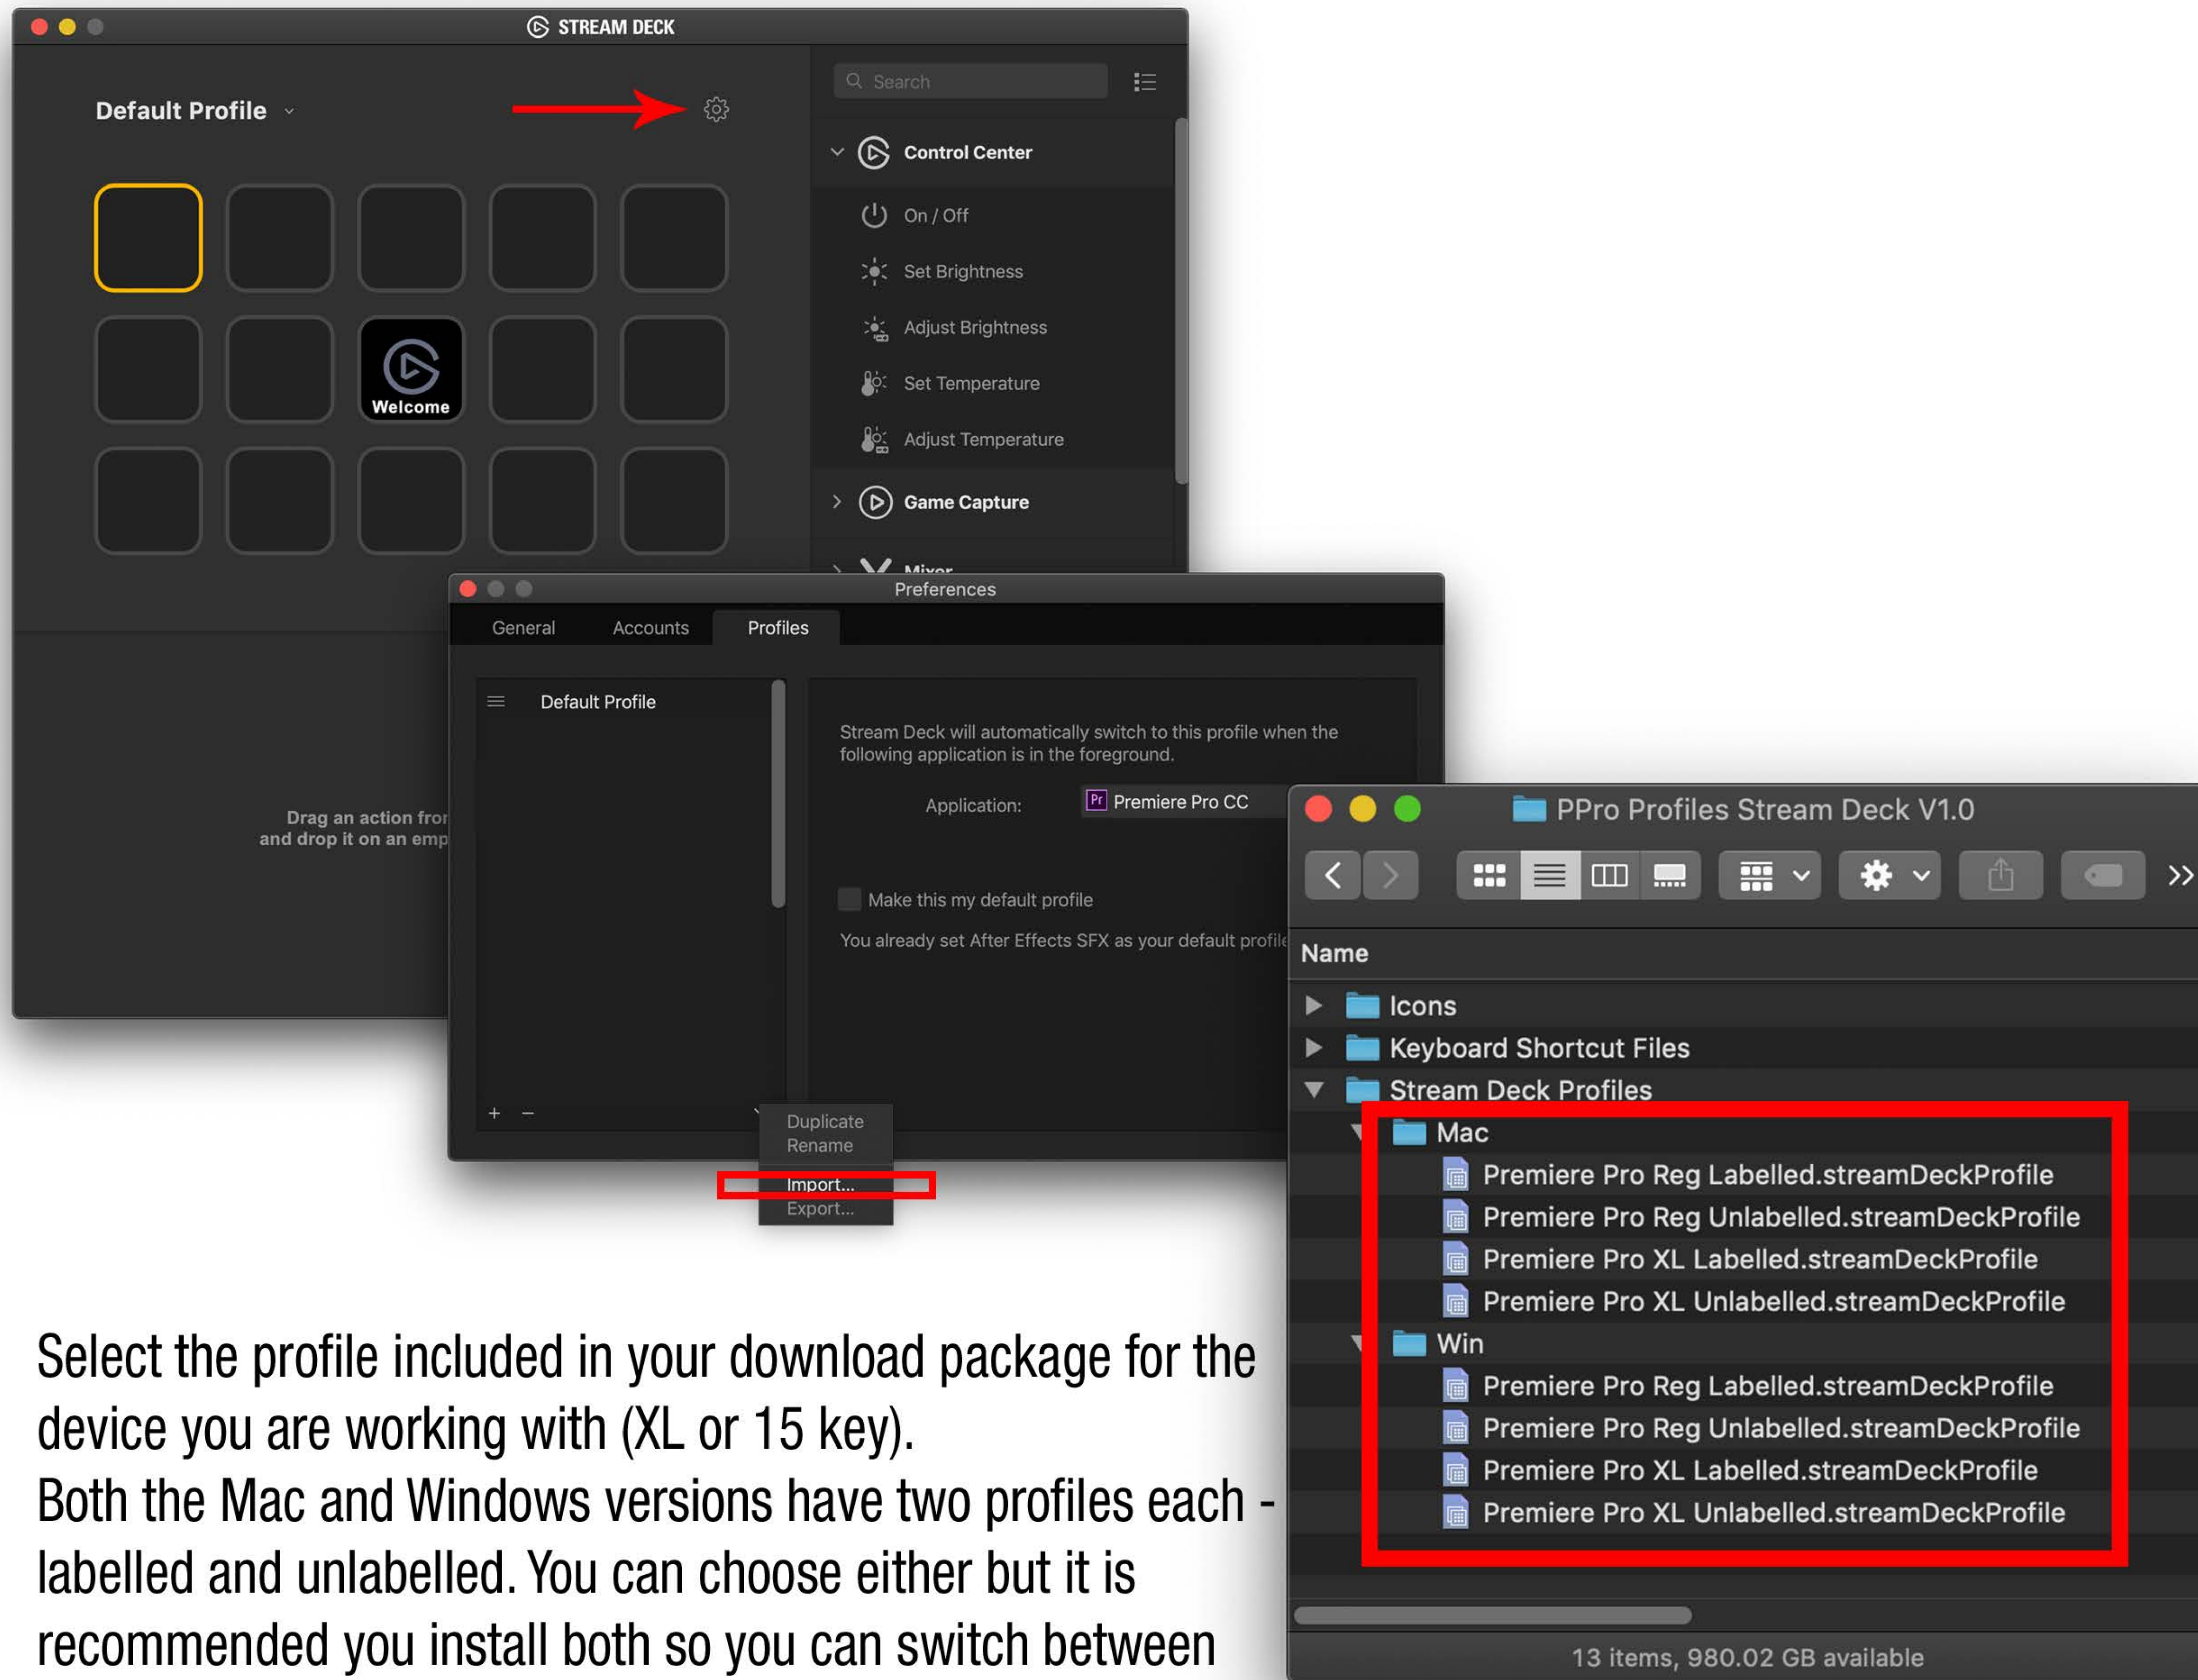

Open Premiere Pro and access the Keyboard Shortcuts menu. From the Keyboard Layout Preset dropdown menu, select “SideshowFX Premiere Pro Profiles”

Installation

Installing the Stream Deck profile

Open Configure Stream Deck and click the preferences gear. At the bottom fly out menu, select Import.

Select the profile included in your download package for the device you are working with (XL or 15 key).

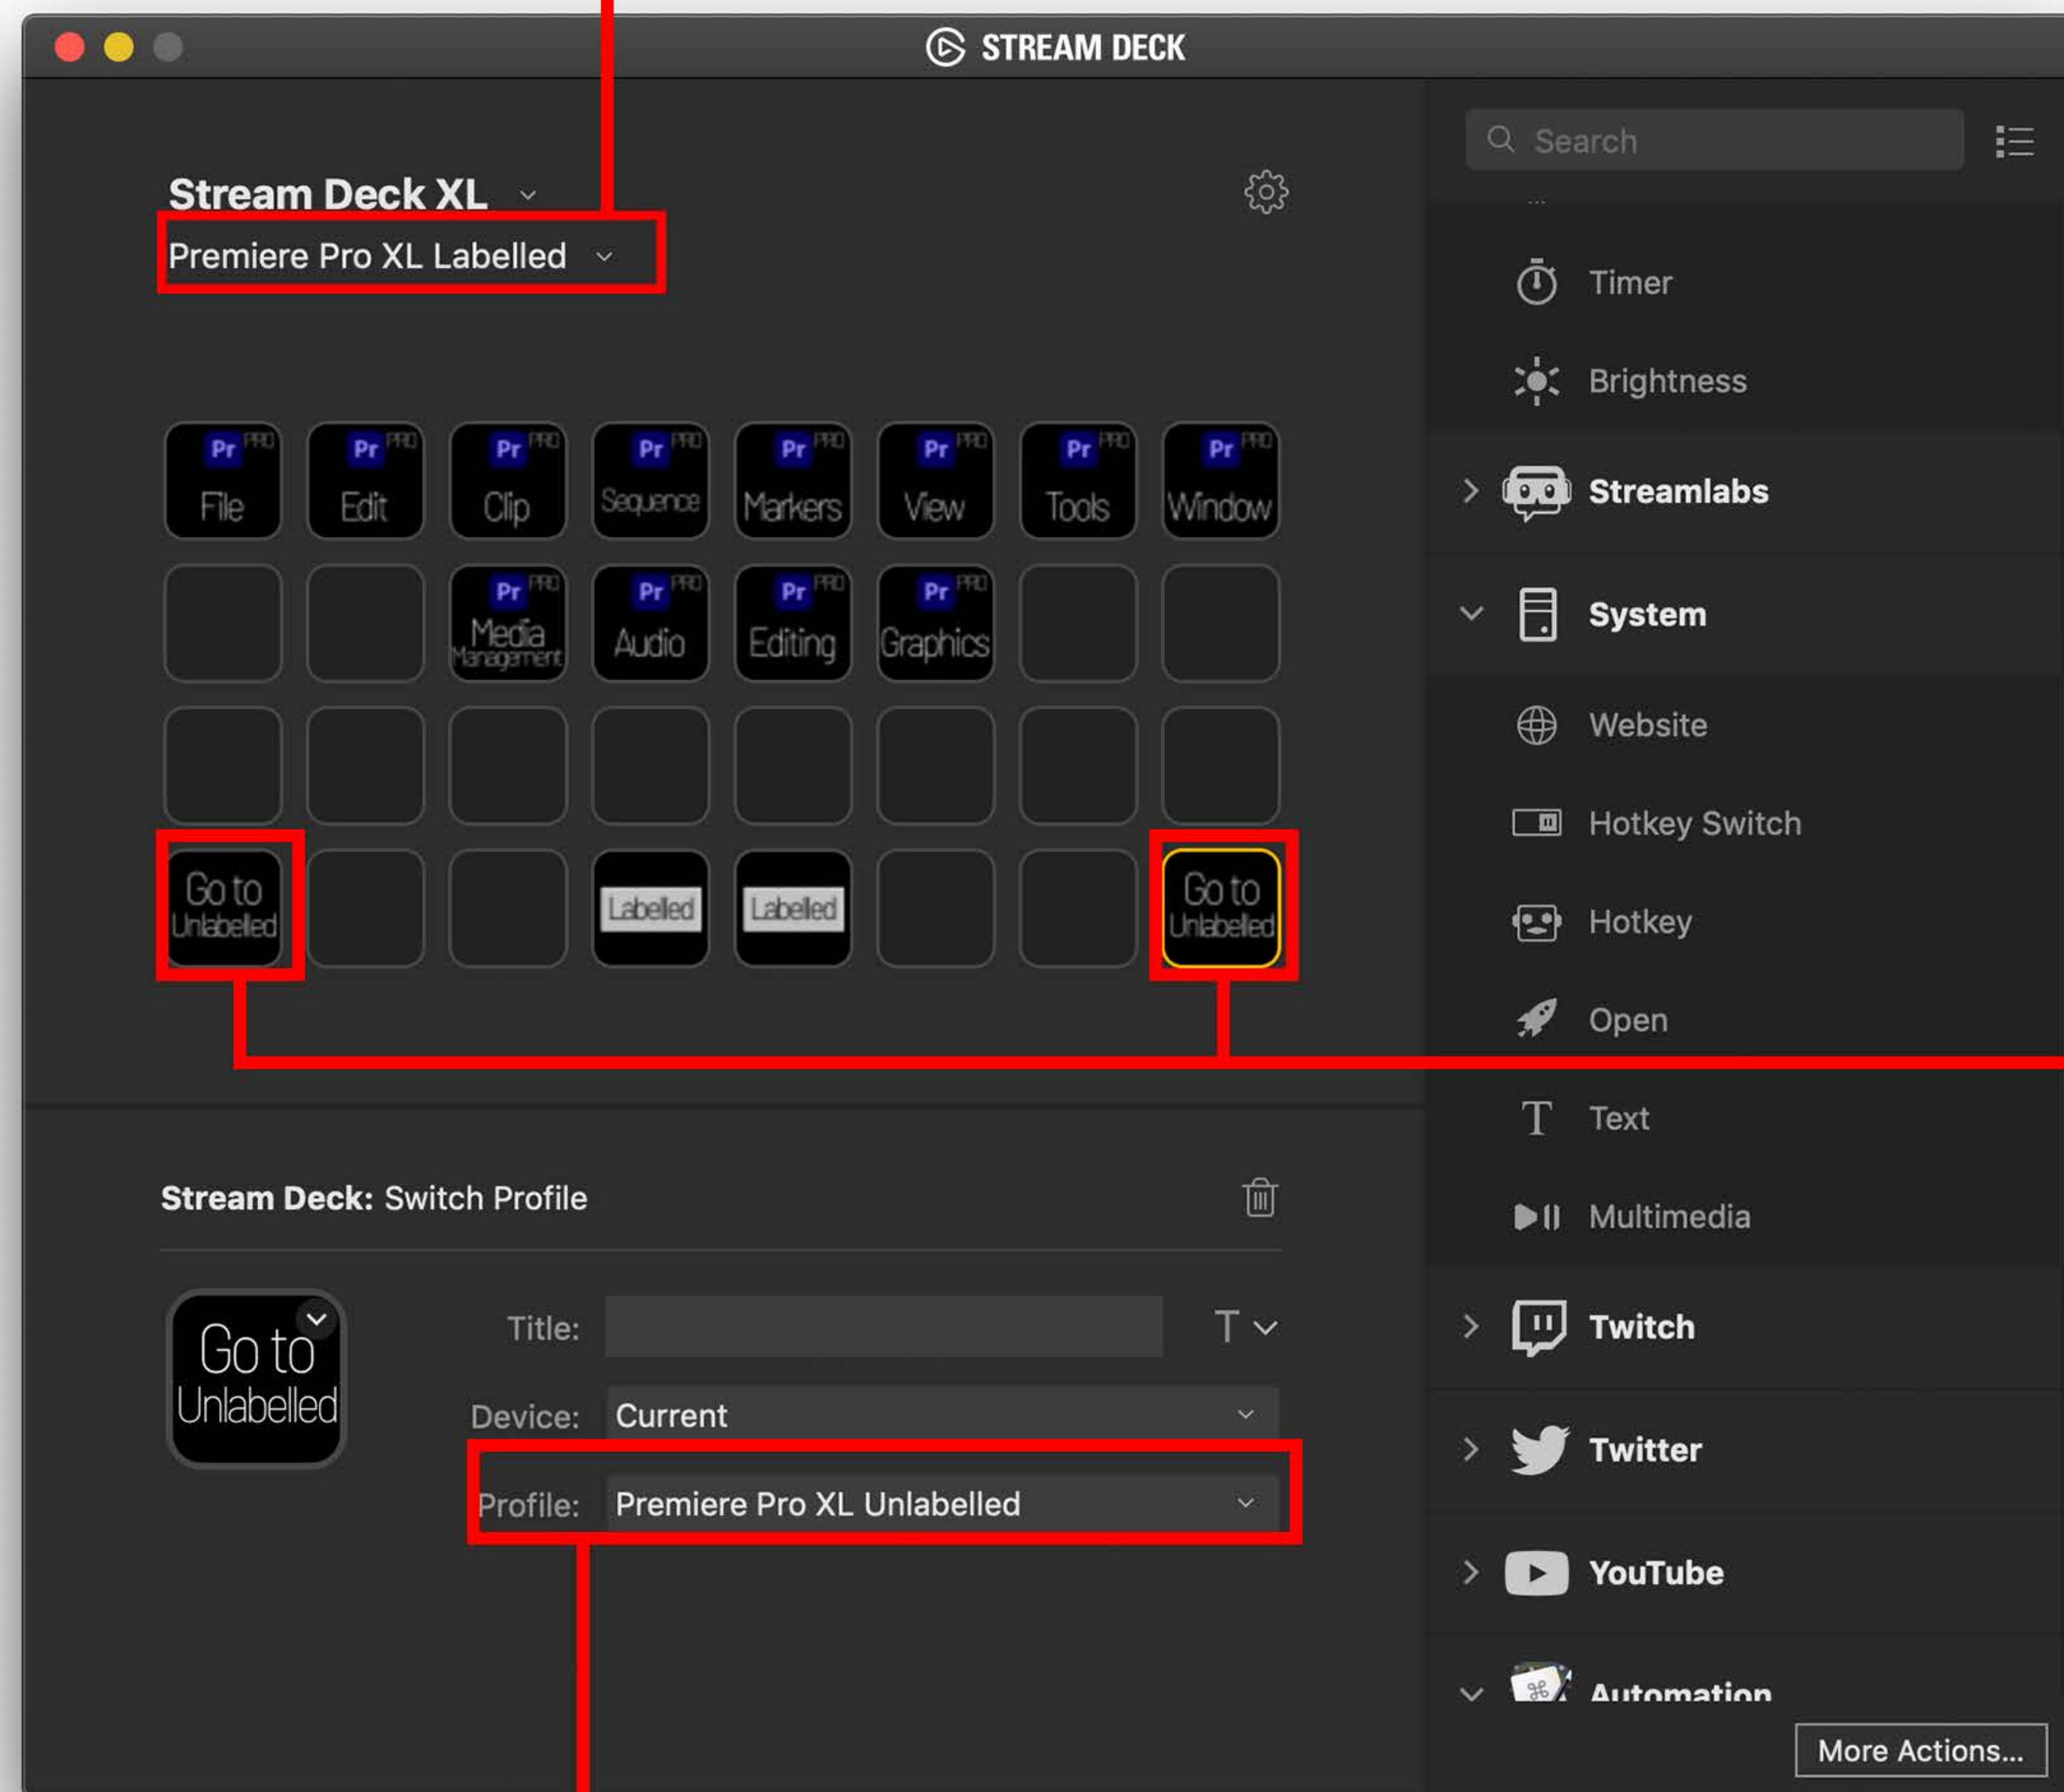

Both the Mac and Windows versions have two profiles each - labelled and unlabelled. You can choose either but it is recommended you install both so you can switch between the two as required.

Installing the Stream Deck profile

If you choose to install both the labelled and unlabelled profiles, you will need to change one button on each profile.

STEP 1

Select the Premiere Pro XL Labelled profile (or 15 Key device select Premiere Pro Reg Labelled)

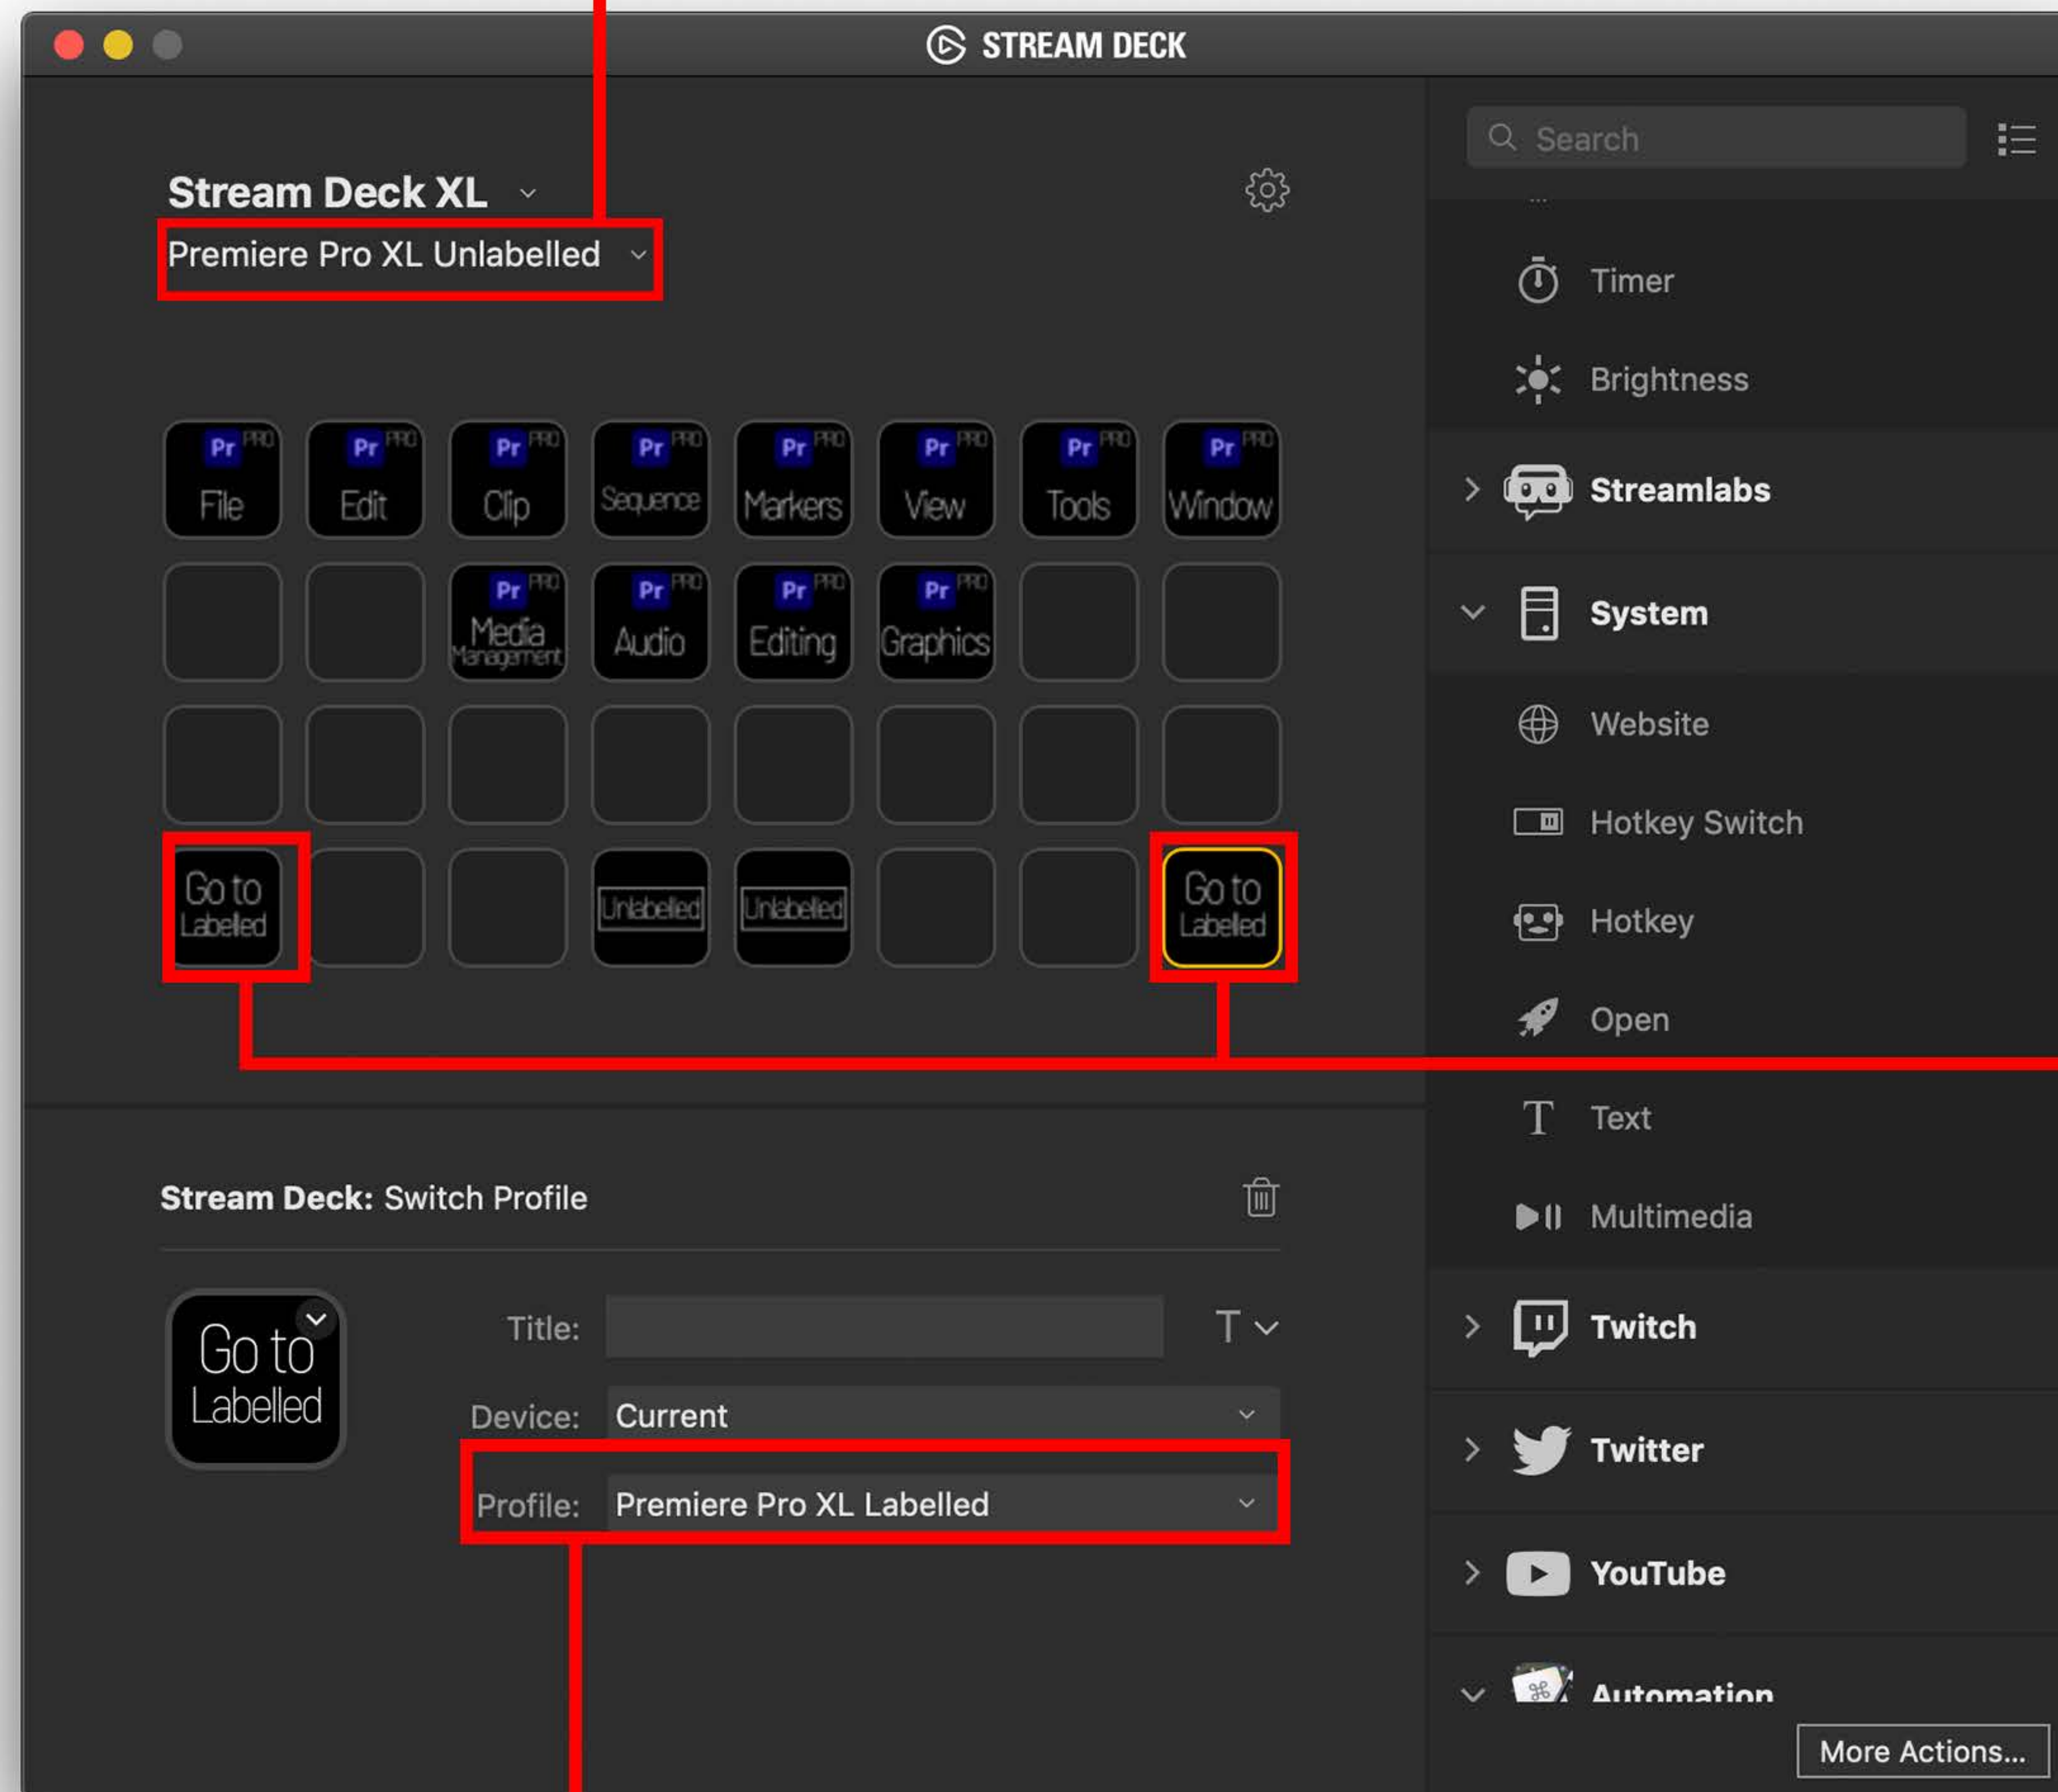

Select a "Go to Unlabelled" button (Repeat the next step both buttons)

Select the "Premiere Pro XL Unlabelled" profile ("Premiere Pro Reg Unlabelled" for the 15 key version)

Installing the Stream Deck profile

STEP 2

Select the Premiere Pro XL Unlabelled profile

Select the “Go to Labelled” button

Select the “Premiere Pro XL Labelled” profile
 (“Premiere Pro Reg Labelled” for the 15 key version)

Installing the Stream Deck profile

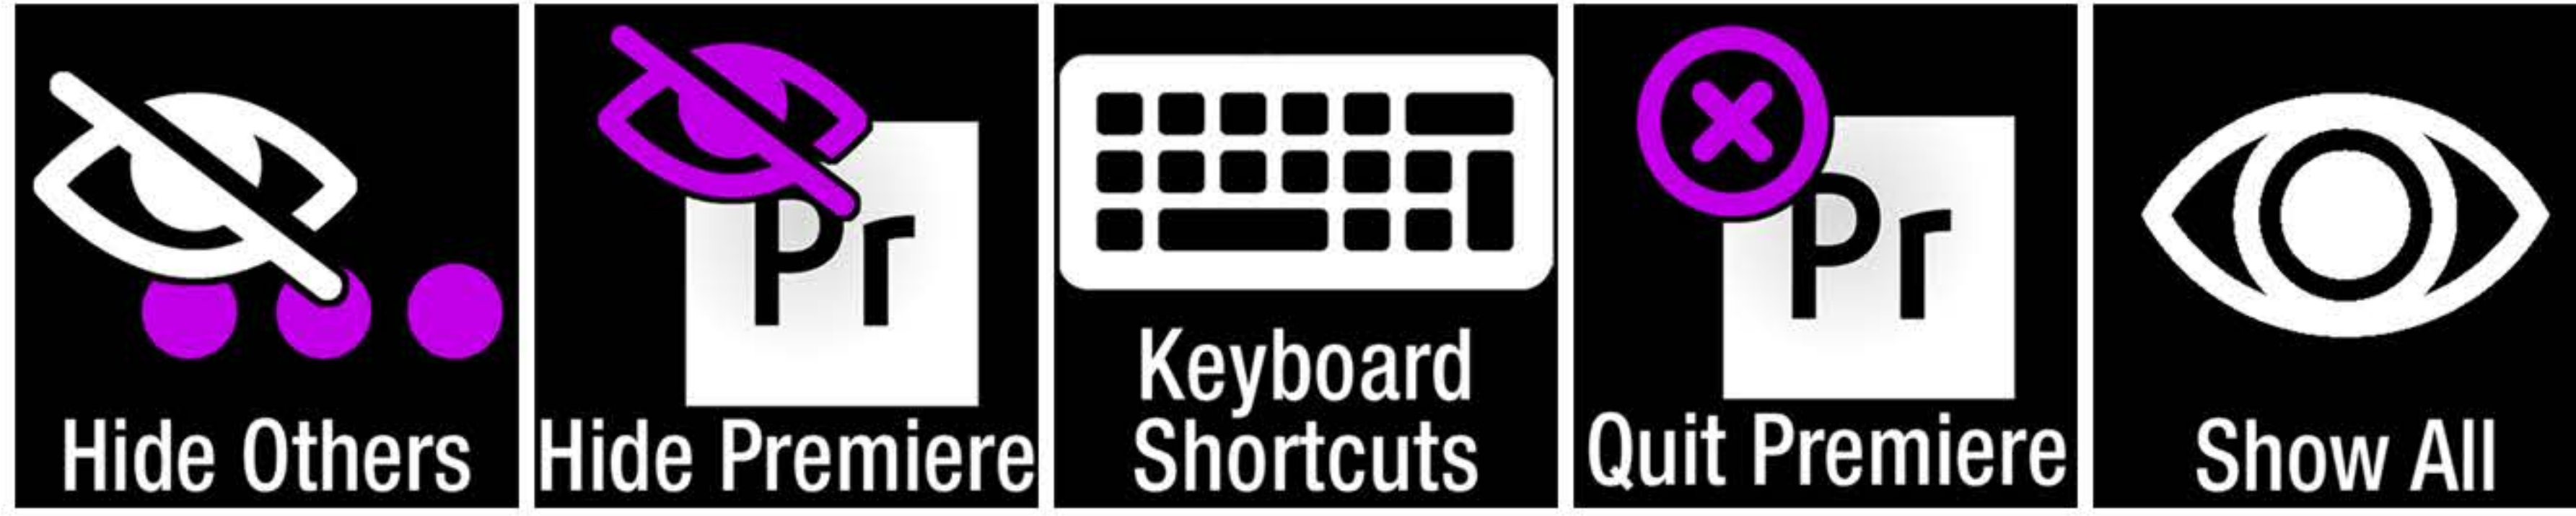

By pressing these buttons from the main menu, you can jump back and forth between the labelled and unlabelled profiles

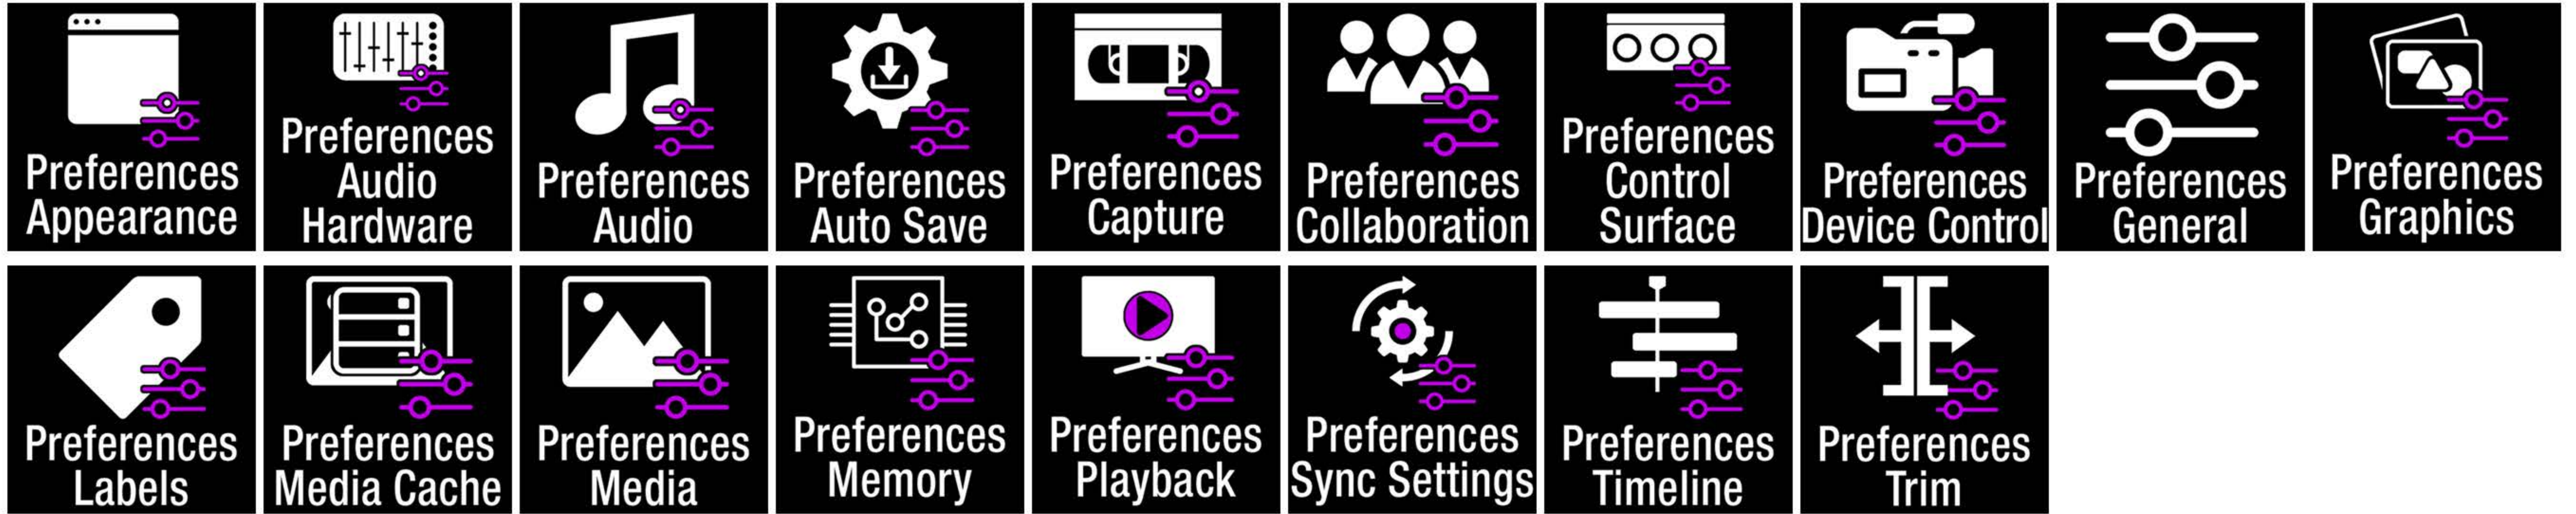

These buttons indicate which profile you are currently in.
