

Premiere Pro Shortcut Icons

Complete Collection

Introduction

Thanks for downloading the Premiere Pro Shortcut Icon Complete Collection! This set was designed to be used for devices such as Stream Deck or Touch Portal but you can apply them to a wide range of uses.

This collection contains over 560 icons representing many of the core commands and tools available in Premiere Pro CC 2020 v.14.0.4 . They are color coded for Menu Commands, Tools and Panel Commands for easy identification. In addition, two additional sets of the icons (white on transparency and black on transparency) are also provided allowing you to place them on a background of your choosing. In addition, we have added complete sets of labelled icons.

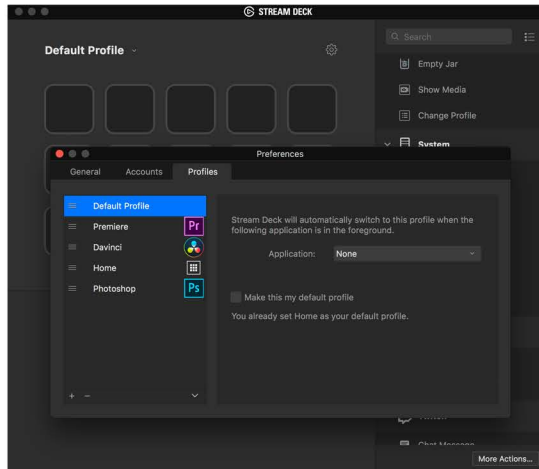

You will also find the file structure mirrors that of Premiere Pro's layout itself, making it easy to locate the icon you need for the function you want to apply it to.

This new version of the collection now includes both Stream Deck and Touch Portal pages in both Mac and Windows ready for you to load and get started right away. See the following pages for instructions on how to install. The Stream Deck profiles come labelled or unlabelled. The main screen will allow you to switch between them with one button so make sure you install both the labelled and unlabelled Stream Deck profiles to take advantage of this feature.

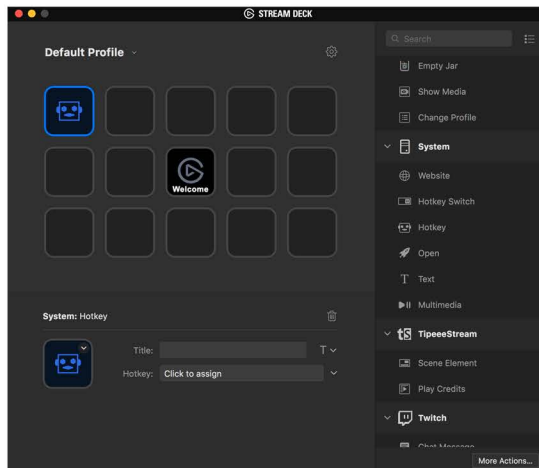

Visit the SideshowFX store for more Icon Set titles at www.sideshowfx.net/buy

Using the Shortcut Icons with Stream Deck

Start by creating a profile in Stream Deck for the application you are using.

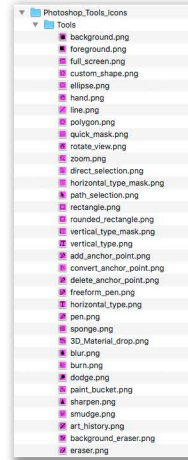

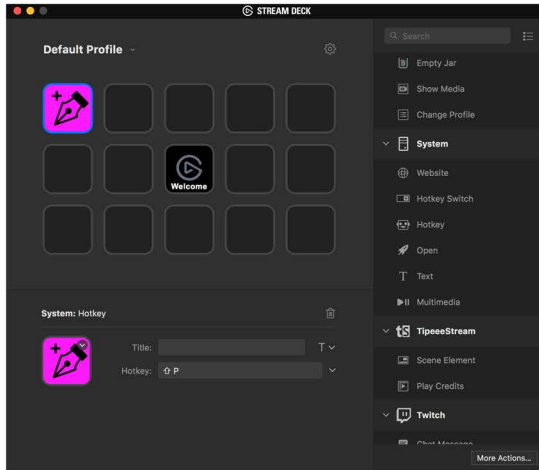

Drag an action from the sidebar into any available button slot (eg. Hotkey)
Enter a title if desired and enter or record an action.

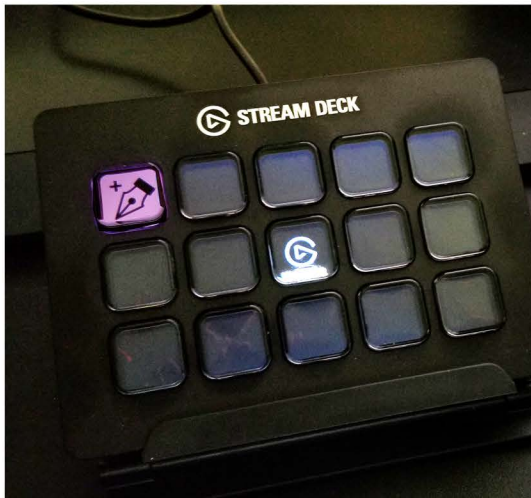

Using the Shortcut Icons with Stream Deck

Locate the appropriate icon on your computer from your downloaded collection.
Drag and drop onto the icon window.

The icon immediately appears on your device, ready to take action.

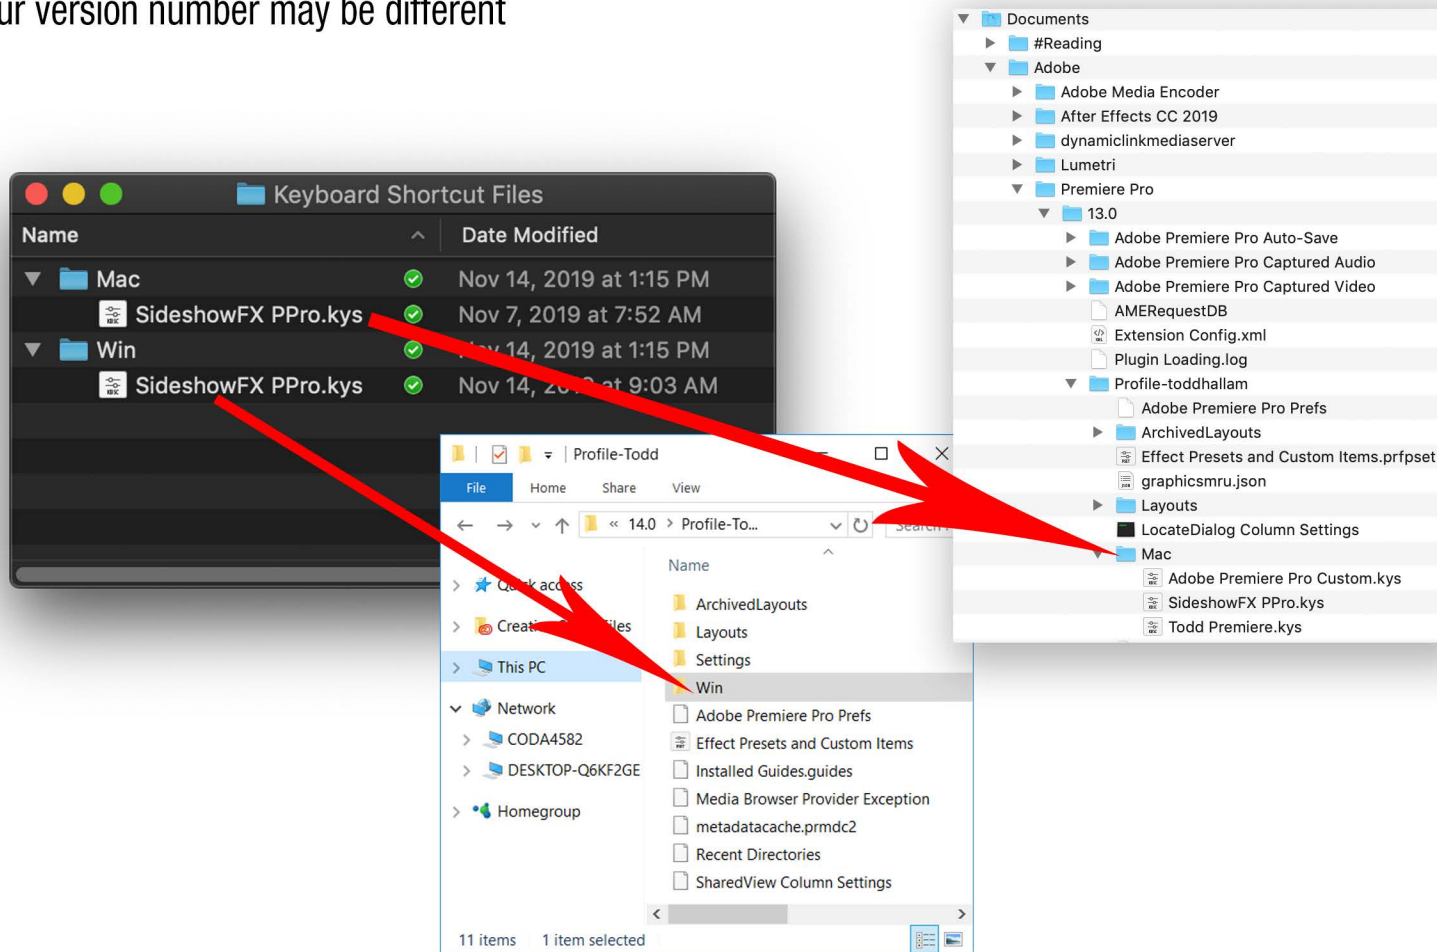

Installing the Keyboard Shortcuts

First, in order for the key commands in Stream Deck or Touch Portal to work, you will need to install the supplied custom keyboard layout. Drag the file SideshowFX PPro.kys to your application profile folder.

Mac: “**username**”/documents/adobe/Premiere Pro/13.0*/profile-”**username**”/Mac

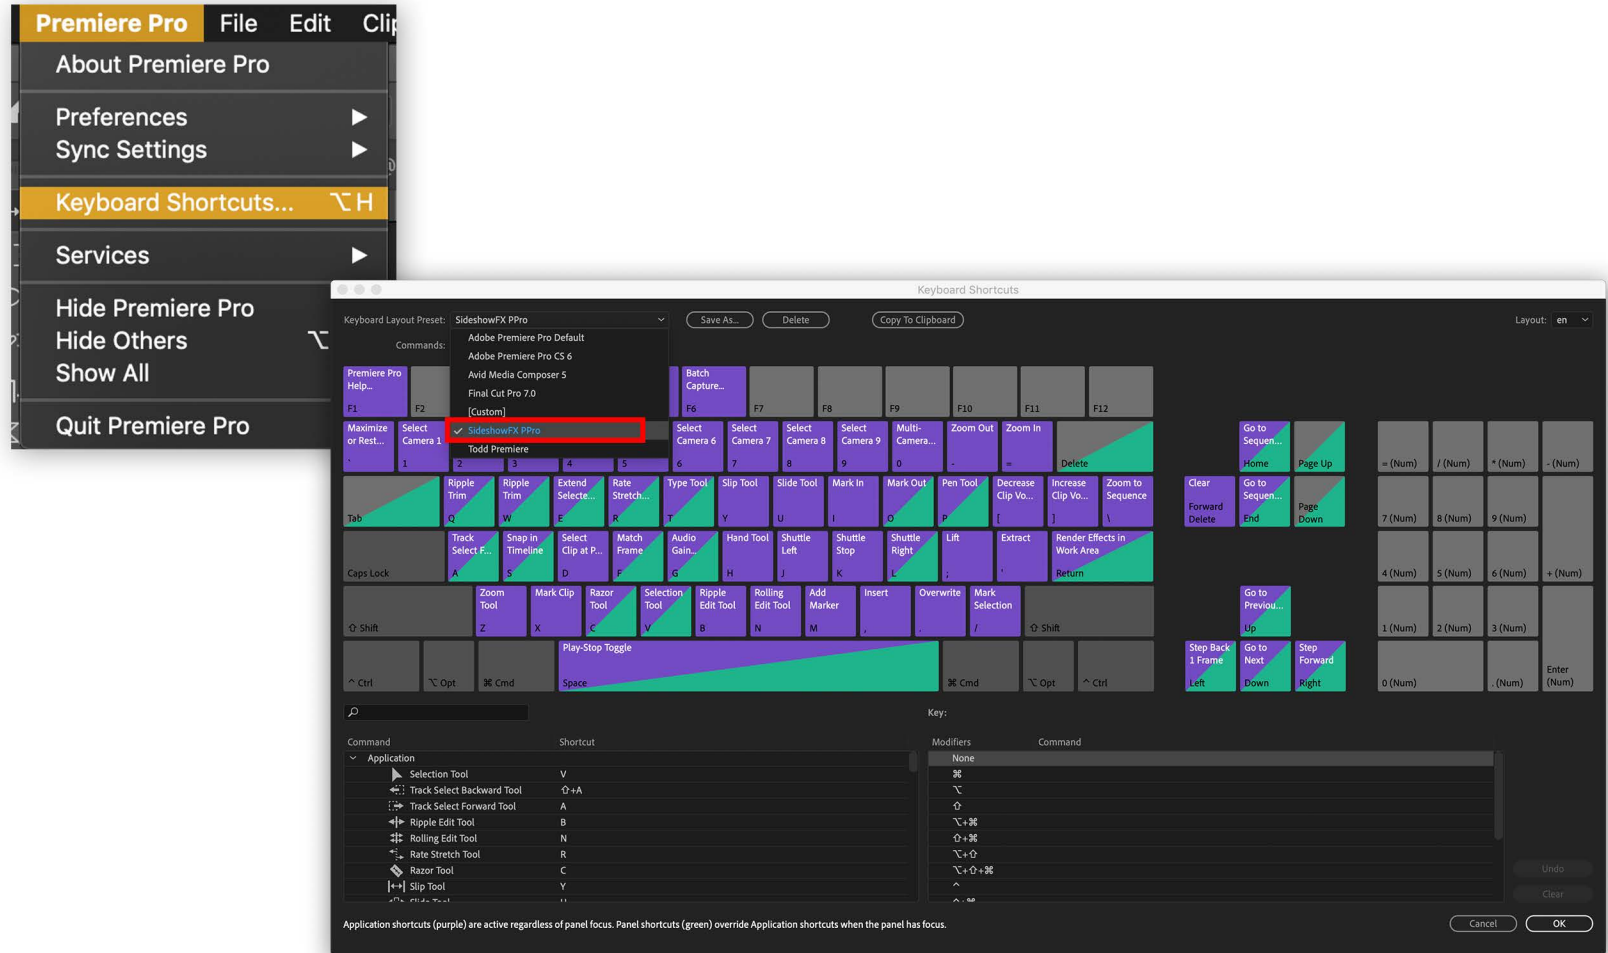

Win: Documents/Adobe Premiere Pro_/13.0*/Profile-**username**/Win

*your version number may be different

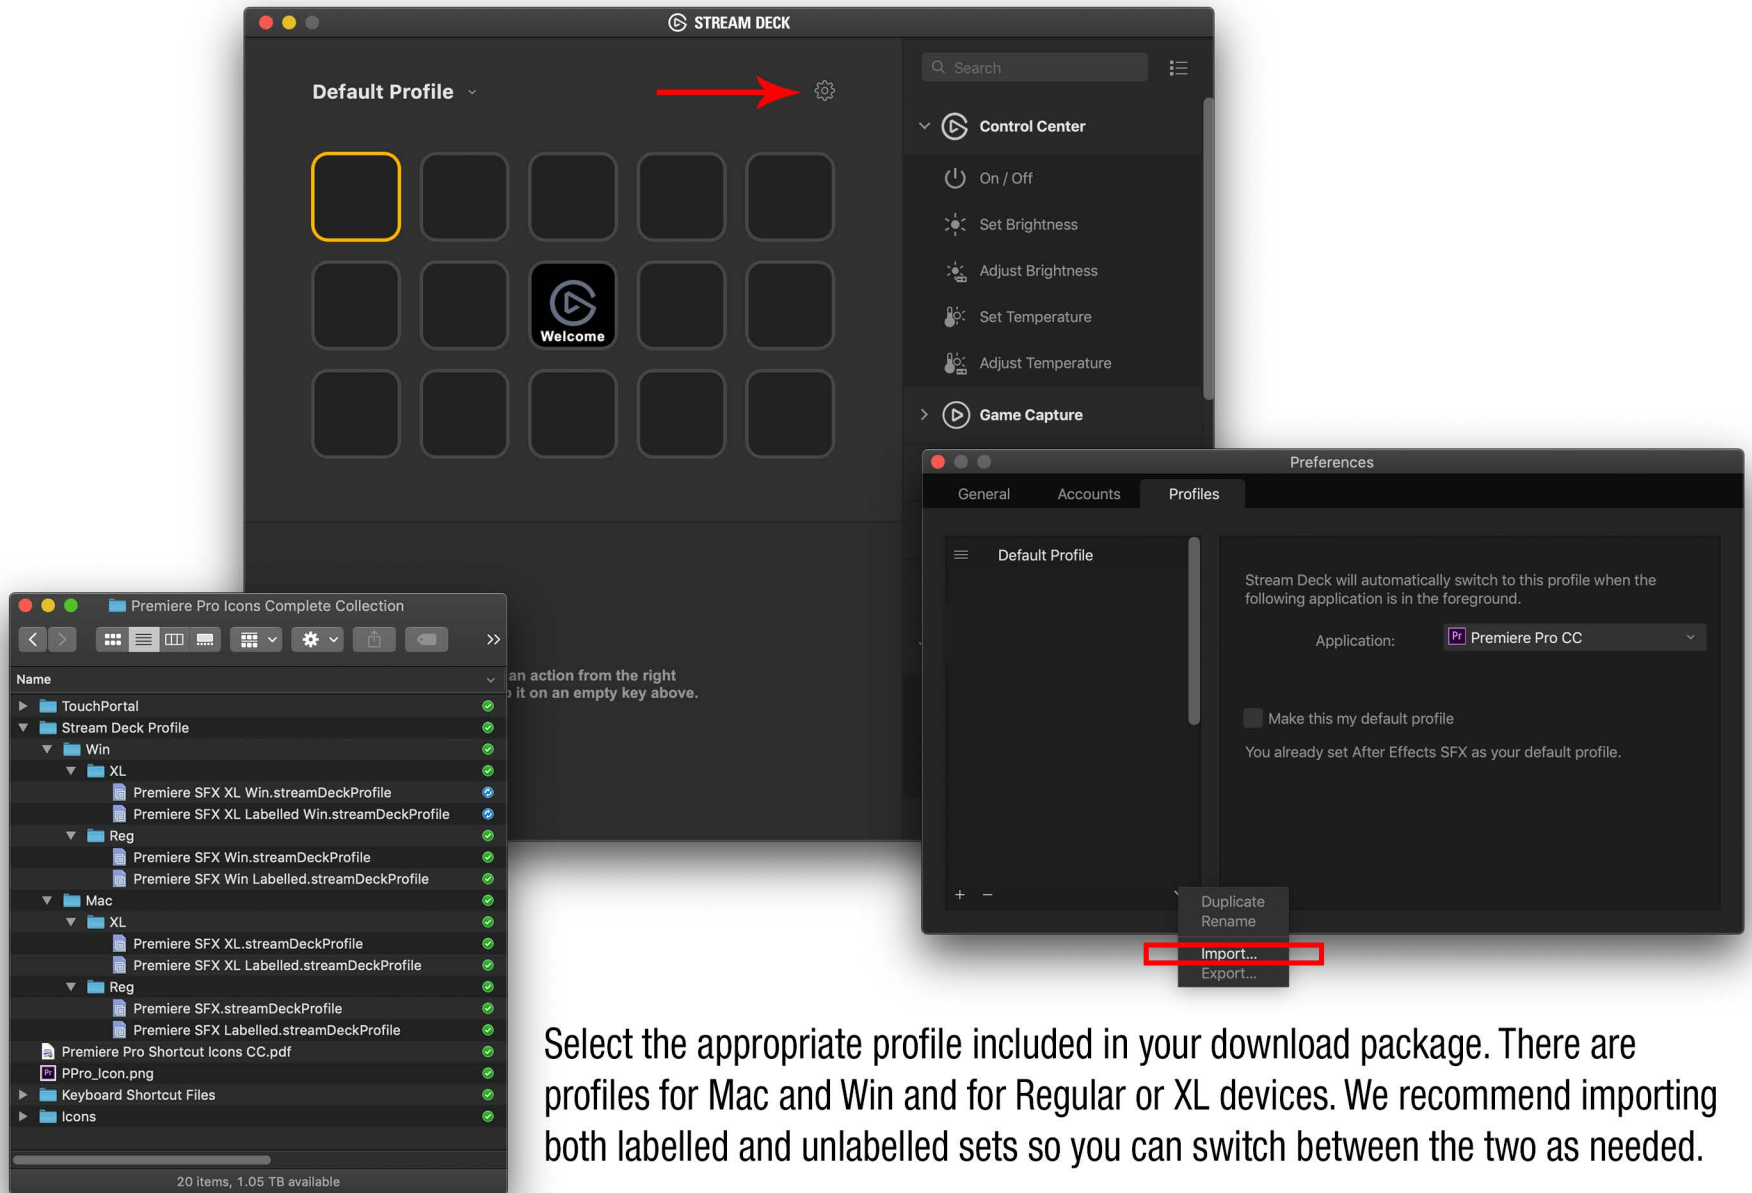

Installing the Keyboard Shortcuts

Open Premiere Pro and access the Keyboard Shortcuts menu. From the Keyboard Layout Preset dropdown menu, select “SideshowFX PPro”

Installing the Stream Deck profile

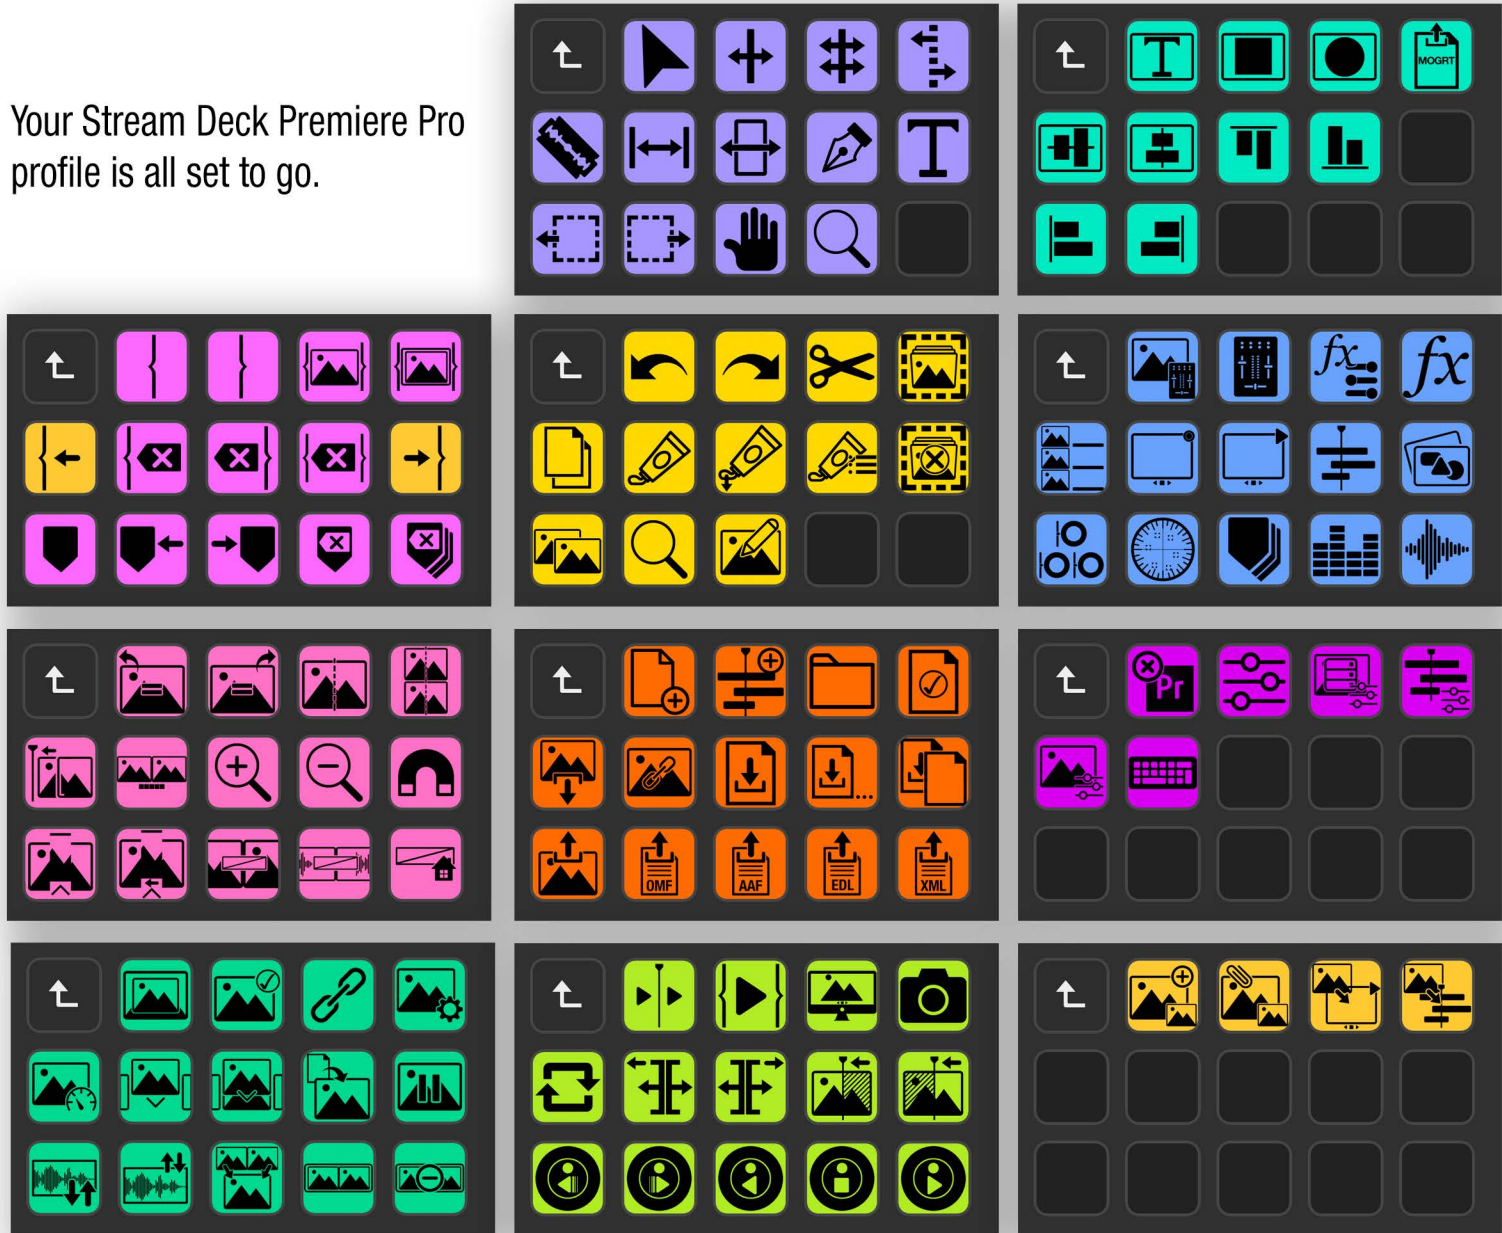

Open Configure Stream Deck and click the preferences gear. At the bottom fly out menu, select Import.

Select the appropriate profile included in your download package. There are profiles for Mac and Win and for Regular or XL devices. We recommend importing both labelled and unlabelled sets so you can switch between the two as needed.

Installing the Stream Deck profile

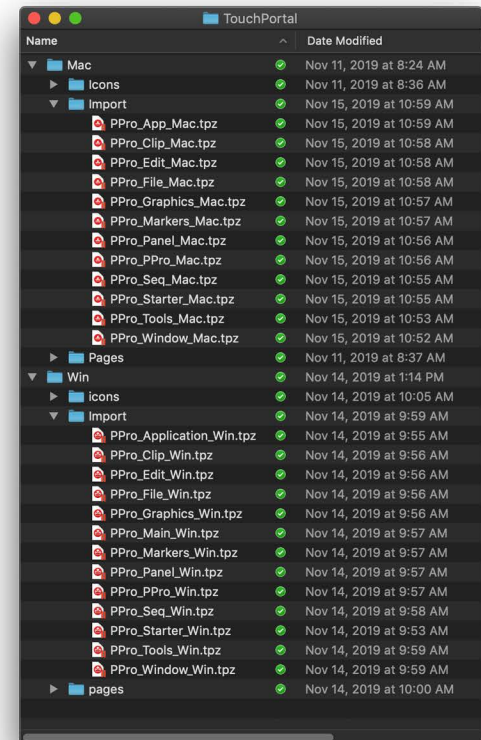

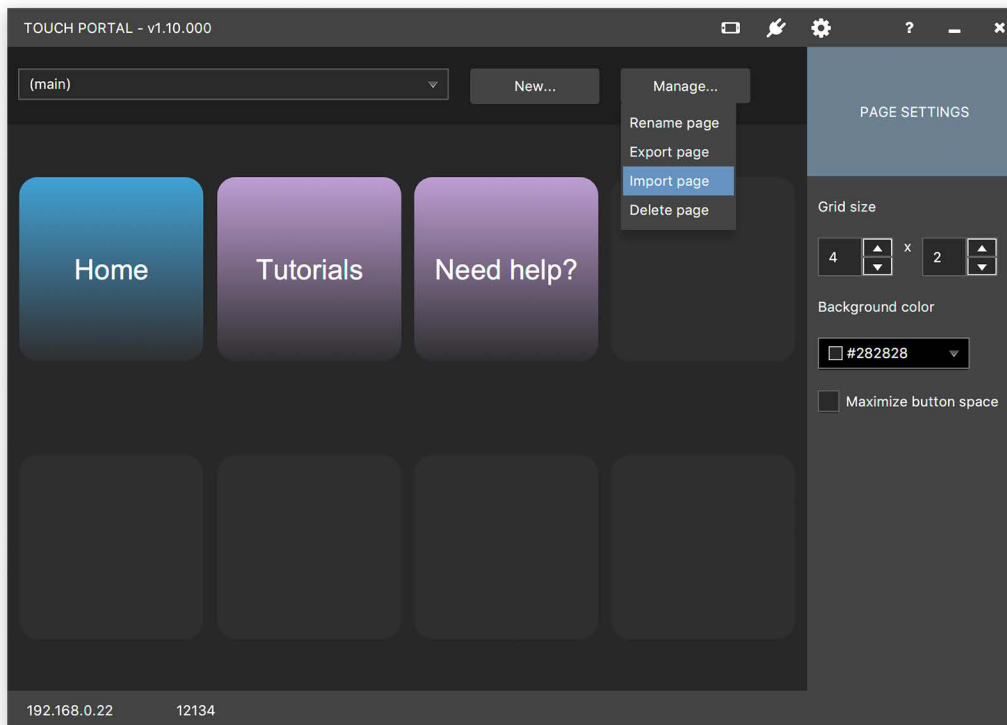

Your Stream Deck Premiere Pro profile is all set to go.

Installing the Touch Portal Pages

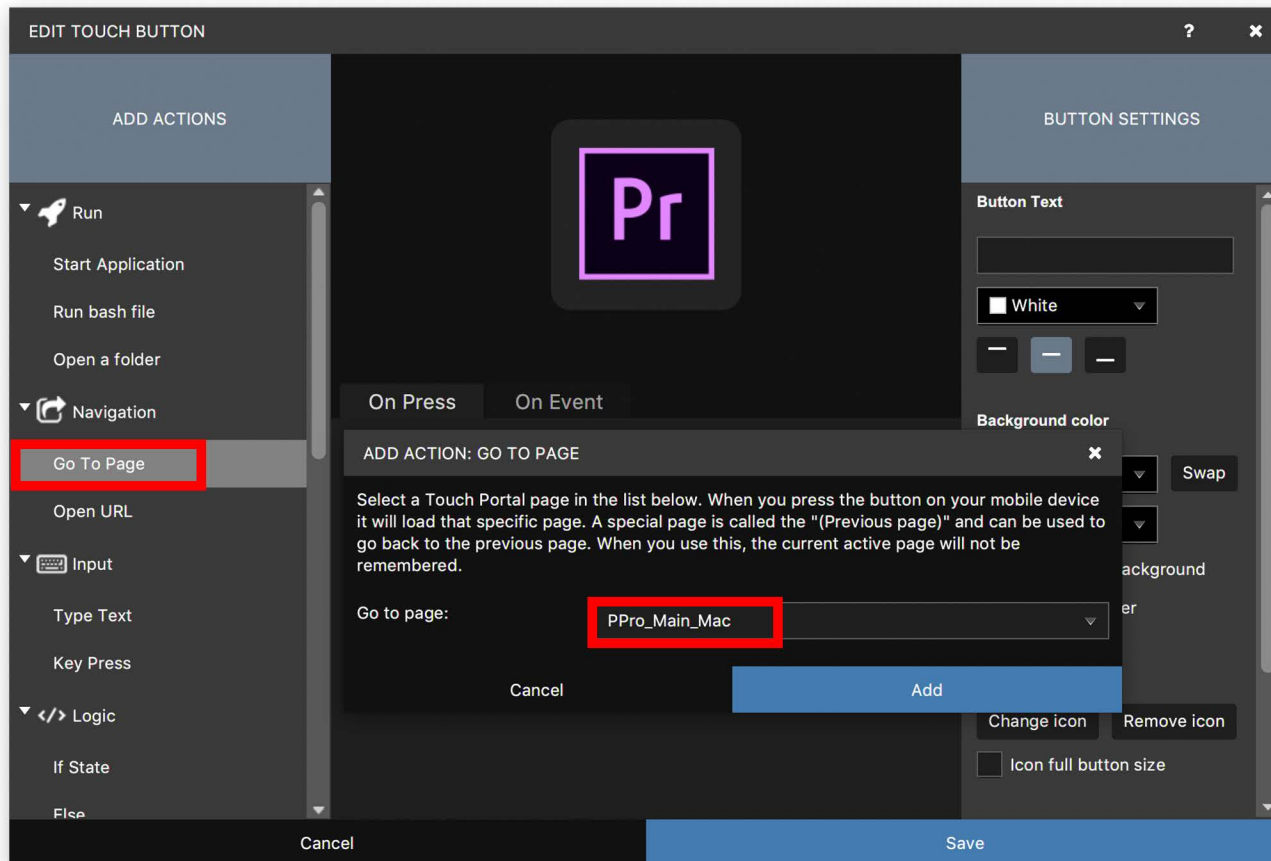

If you haven't already, go to www.touch-portal.com and download the desktop app. You will also need to download the Touch Portal app from the Play Store or App Store on your device. Because there are multiple pages, you will need the Pro version of Touch Portal. There are two different ways you can install these pages.

Method 1: Open Touch Portal on your desktop, select Manage/Import Page. Navigate to the Touch Portal "Import" folder in your Complete Collection download and import each of the pages.

Installing the Touch Portal Pages

On your [main] Touch Portal page, select an empty button (or overwrite an existing), drag the “PPro_Icon.png” image (located in your Complete Collection download folder) to the empty button. Click the button and from the left sidebar chose “Go to Page” Select “PPro_Main_(Mac/Win)”. This will allow you to access all of the pages you imported from the main menu.

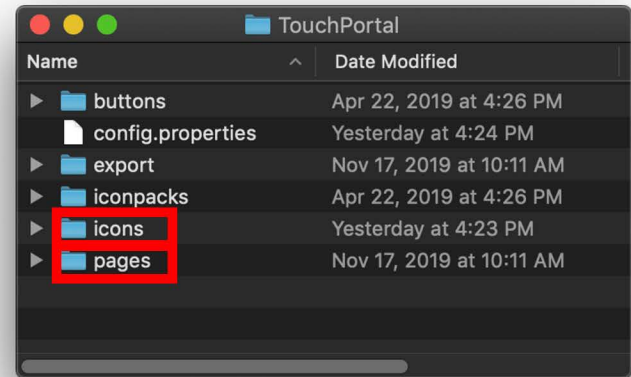

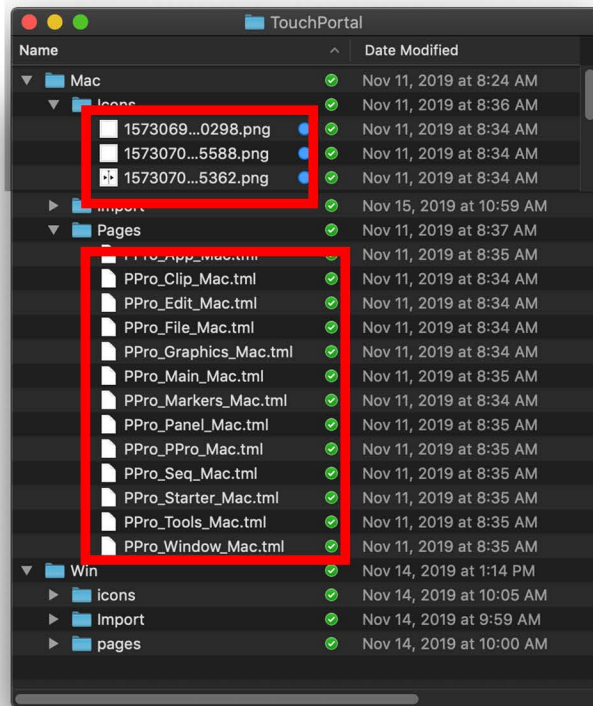

Installing the Touch Portal Pages

Method 2: Copy the **contents** of the “Pages” and “Icons” folders in your Complete Collection download by opening each and dragging the files to the corresponding folder. in your Touch Portal folder which can be found here:

Mac: Users/[*username*]/Documents/TouchPortal

Win: [*username*]/AppData/Roaming/TouchPortal

*Be careful to drag the contents of each folder only, do not simply replace the Pages and Icons folder as this will overwrite any files you have already loaded in the software. Restart Touch Portal.

Installing the Touch Portal Starter Page

You're all set!
