

E-IMAGE

Innovative features at prices that represent outstanding value.

E-Image offers an impressive feature set and high overall quality, at prices significantly less than its competitors – no matter what camera equipment you're using. Today, more and more video professionals depend on E-Image.

E-Image Video Tripods

Using only superior materials and ingenious new designs, E-Image offers videographers a new option – outstanding professional video equipment at a great price.

In order to meet the different requirements of professional photographers and videographers, E-Image tripods are made out of superior aluminum alloy or carbon fibre.

E-Image tripods offer a special feature: a single lock for multiple telescopic leg adjustments for quick adjustments. All tripods can be connected using optional spreaders and dollies.

E-Image Fluid Video Heads

E-Image fluid video heads have been designed with the real-world needs of video professionals in mind. A system of pan and tilt locks and dials ensures perfect dynamic balance – and a steady shot, no matter how challenging the move. They also provide a highly adjustable degree of movement in pan, tilt and counterbalance. Plus, locking knobs, made specifically for the sliding plates of fluid heads, are in place to ensure utmost camcorder safety.

E-IMAGE video tripod kits

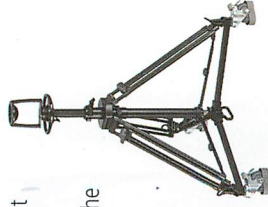

These kits are suitable for a variety of camcorders and uses, from News and Broadcasting to wedding videography. The versatile fluid head provides smooth movement with easy-to-use controls.

NEW! E-Image EI-7902-A Video Tripod Kit

Where a very flat, smooth surface is present the EI 7902 studio pedestal is the perfect stabilizing solution. A studio pedestal has the advantage of being mobile while offering a high amount of stability. The pedestal produces smooth, horizontal tracking shots. It can also move vertically through a pneumatic center column, allowing for a type of camera movement a tripod cannot complete.

Kit includes: 7103H Fluid video head with double handles, AT7902 Aluminum tripod, EI-7000 Adjustable mid-spreader, EI-7004 Dolly, soft case.

Weight: 16.3kg
Tilt Range: +90° /-60°
Working Height: 1020-2020mm
Payload: 8-15kg

NEW! E-Image E-710 Series Video Tripod Kit

The kit features the remarkable 7107H Fluid Video Head, which allows for 0-7 damping positions in pan & tilt and 0-8 counterbalance adjustments. The 710H Series is the ideal choice for video professionals. Double handle bars are available.
